Rupee Now Is Only 17 Paise

Millers & Traders Reminded Of Duty

Mysore, Aug. 5

Sri M. Ramappa Rattehalli, President of the State Rice Mill-owners Association has appealed to the millers and traders in the State to co-operate with the Government in tiding over the food problem.

In an appeal, he has stated, "prices of food grains have risen to the highest levels all over the country and it has become very difficult for the poor and middle class people to buy their minimum requirements of food even to exist at these high rates. The Government and the general public are under the impression that the Millers and Traders are mainly responsible for these high prices. So I appeal to you millers and traders to show to the Government and the public, that we are not responsible, by co-operating with Government in selling the food stuffs at the rates fixed by the Government and also declaring the stocks correctly. It is the right time for all the Millers and Traders to be satisfied with whatever margin of profit that the government fixes We must show to the government that we are always here to meet any type of emergency with regard to the food problems.

This is the time for us to raise to the occasion and serve the general public and not to exploit the situation to our personal profit. We must all pledge ourselves to serve the nation and we must be satisfied with small profits, large turnover and quick return".

At the end of the series of meetings on the first day of his three-day stay in the city, Sri Nanda told newsmen that he had nothing to say. Research In National Labs.

The reviewing committee of the Council of Scientific and Industrial Research, headed by Dr. Ramaswamy Mudaliar, has suggested that research programmes in national laboratories should be oriented in such a way that 80 per cent of the efforts were related to applied research. The applied research projects should be time-targeted, not exceeding a limit of three to five years.

Greater support to universities in the training of scientific and technical personnel and the building up of institutes of advanced research to create a strong supporting base for expansion of science and technology has also been recommended.

It has called for bridging of the gaps both between industrial programming and research planning on the one hand, and between research and its application to industry, on the other.

The committee has recommended vigorous support to research on population control and communication and application of results in the widest and most efficient manner. Unless the birth rate was controlled economic development will suffer.

Stressing the building up of our own specialised knowledge on technical know-now, it has deplored the industry's disinclination to make use of indigenous know-how and says that where the latter is available to supplement a foreign process or even improve with it, the industry should be prepared to take risks.

NO REOPENING OF BOUNDARY ISSUE

MYSORE WARNS OF FLARE-UP

Bangalore, Aug. 6

The Mysore Cabinet told Union Home Minister Nanda yesterday that it was opposed to the reopening of the Mysore-Maharashtra border problem alone, particularly involving major changes.

If the issue was reopened, it contended, it would create a situation where there would be a linguistic flare-up throughout the country where border problems between various States existed.

The Mysore Government is stated to have repeated its view that if the Central Government was interested, it might appoint a commission on an all-India basis to consider all these border problems.

As far as the Mysore Government was concerned, the Chief Minister and his colleagues told Sri Nanda that Karwar, Belgaum, Nippani and Bidar belonged to Mysore and this settled fact should not be touched.

They also expressed their willingness to consider any minor changes that might be found necessary.

The delegations from North Mysore who met the Union Home Minister firmly opposed any move to re-open the settled border issue between Mysore and Maharashtra.

Twenty Opposition members of the State Legislature also met Sri Nanda and urged the constitution of a Boundary Commission to settle the border disputes between Mysore and the four neighbouring States.

The delagates from South Kanara urged for the merger of Kasargod from Kerala in Mysore.

Mysore Students Meet Kanthi

A student delegation of private colleges in Mysore met Education Minister Kanthi yesterday at Bangalore and urged that the fees in private colleges should be reduced to the level of the Government colleges.

The students are on strike since past one week.

The Education Minister told them that they had nothing to do with the Government and asked them to send their principals to the Government or the Vice-Chancellor of the Mysore University.

He pointed out that Government could not impeach the autonomy of the university by forcing its decisions on it.

As for the private colleges, the fact remained that they were much better run than their Government counterparts and any extra fees that they might charge was worth it. If the students did not feel so, it was up to them to represent to their principals who, in turn, should come to Government with a plea for more grants.

BORDER PROBLEMS WOULD BE SOLVED

NANDA HOPEFUL

Bangalore, Aug. 7

Union Home Minister Nanda yesterday concluded his three-day talk with Mysore leaders regarding Mysore-Maharashtra boundary dispute.

He told newsmen that he would submit his report on the vexed question to Prime Minister Shastri and Congress President Kamaraj on Aug. 14.

Sri Nanda will hold tripartite parleys with Chief Minister Nijalingappa and Maharashtra Chief Minister Naik on Aug. 10 at Delhi.

The Home Minister made it clear that finding a solution to the Mysore-Maharashtra boundary dispute was not his seeking. Nor was he raising any new issue thereby. The problem was very much alive and open in that his prodecessors in office had been seized of it. While he was not creating any new problem, he was only appling his mind to arrive at a solution.

In a democracy, Sri Nanda said, no one could shut out questions being raised. It was the duty of the Government to listen to them and to persuade the people to take a proper view of them. Simply brushing aside a question would only lead to a feeling of discontent among the people.

Asked about the boundary disputes of other States, he said he was not ruling out anything, nor was he accepting anything. His attitude was not to evade an issue when it was posed before him.

Beyond saying that he had given the fullest hearing to everybody and had spent more time in Bangalore than in Bombay, Sri Nanda preferred not to say anything at this stage.

Asked whether he was hopeful of a solution, he said he was hopeful that all our problems would be solved.

US OFFENSIVE IN NORTH VIETNAM

The Soviet Union asked the United States to halt action against North Vietnam. The Soviet delegate Mr. Morozov in the Security Council labelled the American bombing of coastal targets in North Vietnam as 'acts of aggression'.

The U. S. delegate, Mr. Stevenson told the Council that the U. S. sought no widening of the Vietnam conflict but was dealing with a regime which had not learnt the lesson that aggression was doomed to failure.

Mr. Stevenson said there was a 'very easy way to restore order in South-East Asia' and bring an end to American military aid to South Vietnman.

'Let all foreign troops withdraw from Laos. Let all States in the area make and abide by the simple decision to leave their neighbours alone'.

Charged with killing and eating a 24 year-old blonde, Akbar Shah was sentenced to life imprisonment by the Sessions Judge of Srinagar recently.

Akbar Shah was arrested in September 1962 after a frantic search by the police. He was alleged to have eaten about a dozen teenagers-mostly girls. The police chased him for months and combed the entire hill area of Kargil, but he eluded them and escaped into inaccessible mountainous area.

A police party eventually found him in a jungle. In the struggle that ensued he is alleged to have chopped off a hand of one of the policemen. A few shots in the air made him surrender.

Akbar Shah belongs to a village in Kargil where people used to eat raw meat in times of acute food shortage.

He reportedly stole buried bodies from graveyards. After having developed a taste for human flesh he started kidnapping and killing young boys and girls.

Batches of 51 workers will fast outside the Prime Minister's residence for ten days.

GOVERNMENT WILL MEET FOOD CRISIS

CONGRESS CONFIDENT

The Congress Working Committee meeting at Delhi yesterday adopted a resolution on the country's ability to tide over the present difficult situation in view of the sizable imports of foodgrains and better prospects for the khariff crop in the coming season.

After seven hours of discussion, the committee blamed the rise of prices and emergence of local and temporary scarcity on the 'imbalances in the system of distribution'.

The committee said that the imports of roughly 4.6 million tonnes in 1963 were being stepped up to about 6 million tonnes in 1964. Therefore, it claimed that in the short run, the rate of growth of population has been more than compensated by the growth of availability of foodgrains.

The committee noted the Government's resolve to the firm action against those who concealand hoard their stocks after period of grace mentioned by the Prime Minister. It felt sure that the country would be whole heartedly and solidly stood behind the Government in any action they might take against the anti-social elements.

It felt that the utmost importance should be attached to the strategy of agricultural development. It was of the view that the proper implementation of various policies called for the highest priority in terms of administrative personnel, finances and other impulses. The Central and State Governments were asked to review their policies and implementation.

After directing party members to explain to the people the reality of the present situation, the committee appealed to all responsible citizens to strive for the creation of an atmosphere of confidence in the community.

Worst Food Crisis Over

Union Food Minister Subramaniam stated yesterday that the worst of the current Indian food crisis has passed. 'We are over the watershed. With the prospects of almost a bumper monsoon kharif crop, along with the steps taken by the Food Ministry, the situation has begun to ease', he added.

The Minister hoped to achieve self-sufficiency in foodgrains in the next four or five years if the scheme to increase the output was successful. He also hoped to stabilise the prices slightly below the present level. He said there had been 22 per cent. rise in the prices of foodgrains in the post 18 months compared with27in previous ten years. This had in effect made up the lag in agricultural prices behind the industrial prices during the same period.

Smt Pandit suggested that drastic steps should be taken to create a social climate in the community for the cause if age-long traditions came in the way of the family planning programme they should be broken down and reforms introduced.

Dr. Sushila Nayyar said the birth rate could be speedily lowered if every district in the country had six sterilisation operations per thousand per year.

S. Vietnam Junta Bows

PRESIDENT SACKED

South Vietnam's ruling military junta yesterday bowed to untiring student and Buddhist demonstrations and decided to replace Major-General Nguyan Khanh as President.

It decided to withdraw the provisional constitution approved on Aug. 16--main target of student demonstrations and inter-religious clashes in several towns during the last four days.

In Saigon, about 20,000 demonstrators surged to Maj.-Gen. Khanh's office after he had issued a communique promising revision of the Constitution, apparently designed to force their demands.

The junta then promised to elect a new head of State to replace Maj. Gen. Khanh. It would then dissolve itself and its 58 members would return to their military posts.

REORGANISE ADMN. TO MEET FARM NEEDS

Union Food Minister Subramaniam yesterday called for a reorganisation of the administrative system to meet the needs of agriculture.

He said 'the administrative system believes in protecting itself against a possible objection from auditor or query by the Public Accounts Committee rather than to protect the farm'.

It was unfortunate that at present the agriculturist looked on the village level worker with 'almost amused disrespect'. This was partly because the village level workers had not been properly chosen or trained.

Criticising the working of cooperative credit institutions, he said that many of these institutions 'are the preserve of the privileged few'. The money-lender thrived on a situation 'in which the cooperative agency regards the rituals of form-filling as more sacrosanct than the urgency of credit needs'.

MYSORE FOOD SITUATION CRITICAL

FOR NEXT 6 WEEKS, SAYS C.M.

The question of moving akkalu rice from Andhra, which is in demand in Bangalore, has been taken up by the Mysore Goverment with both the Central and the Andhra Pradesh Governments.

Both Union Food Minister Subramaniam and the A. P. Chief Minister had assured Nijalingappa that they would look into the matter.

Government had already moved the Centre for an upward revision of the rice price of akkalu variety from Andhra so that the difficulties now experienced by merchants would not be there and stocks could move freely.

AP Rice For Mysore

Bangalore, Sept. 5

The Andhra Pradesh Government has agreed to supply to Mysore 16,000 tons of Akkallu and other varieties of rice during September and October.

Revenue Minister Krishnappa who negotiated this deal stated that a team of Mysore Government officers will be leaving for Hyderabad soon. If necessary, the rice stocks will be transported by special trains.

The rice, he said, will be distributed through cooperatives.

Annually, Mysore gets from Andhra about 85,000 to one lakh tons of rice and this year, for the eight months period up to August, the State had received about 75,000 tons.

The Minister assured that there was no scarcity of rice and appealed to the people not to be scared.

PRICE ENHANCED

The Centre has agreed to the Mysore request for a rise in selling price for Andhra Akkallu rice and has decided to enhance the price by 50 paise per quintal for whole sale dealers and by one rupee per quintal for retailers. That means that the retail rates would go up by one paise per kilo.

The revised rates for Akkallu in Mysore would be Rs. 71.50 per quintal for wholesale dealers and Rs. 76 per quintal for retailers.

Evening Colleges In Mysore Varsity

Mysore, Sept. 5

The courses and the syllabus would be the same as prescribed by the University for day classes.

The Council deleted the recommendations regarding the age minimum of 21 years and the production of employment certificates.

Prof. Thotappa, who moved the proposition, said that about 20 universities in India including the Karnatak University had already started such courses. The Centre had agreed to pay Rs. 20,000 as a grant to the institutions starting such colleges with having a minimum of 150 students.

Fate Of III Class Degree Holders

Mysore, Sept. 5

The question of allowing third class degree holders to appear for the examinations again to improve their prospects was figured largely at the Academic Council yesterday.

Sri Sivappa said that third class degree holders were like untouchables in job market and it was necessary to afford them opportunity to improve themselves.

Sri Jayakumar Anagol, Controller of Examinations, said that from purely academic point of view such students should be allowed to appear for examinations provided they rejected the third class degrees.

Prof. C.D. Narasimhaiah wanted that third class degree should be abolished.

Sri V. F. Srinivasan said as the PUC students had been given the option to appear again in for the examinations, all degree holders who got third class should be given an opportunity again.

On the suggestion of the Vice-Chancellor, a five-member committee was constituted to go into the question whether the third class degree should de abolished once for all or they should be allowed for examinations again for getting a better class.

The Academic Council accepted a donation of Rs. one lakh from Sardar K. Basavaraje Urs to institute a scholarship in the memory of his late wife, Mrs. Leelavathi, to be awarded to a merit student for scientific research.

The Council, at the outset, adopted a resolution mourning the death of late Prime Minister Nehru.

Music And Dance Courses

Mysore, Sept. 5

The starting of a three-year degree course in music and a three-year degree course in dance was approved by the Academic Council of the Mysore University yesterday.

Sri Sivappa said that when fine arts were not getting the patronage of kings and rulers as in the past, it was now the duty of the people to promote them.

The Vice-Chancellor, Dr. Shrimali, said that Mysore, noted for its Karnatak music needed a college of its own. He said the State Government had assured adequate aid to such a college.

Tightening Of Corruption Act

The Government of India yesterday approved a legislation incorporating some of the recommendations of the Santhanam Committee on prevention of corruption.

The legislation which comes up before monsoon session of Parliament seeks to ensure speedy trial of cases of bribery, corruption and criminal misconduct against officers and to make the existing laws relating to corruption generally more effective.

By amending the Prevention of Corruption Act, the legislation seeks to make the possession of disproportionate assets by public servants as a substantive offence.

It is also proposed to penalise habitual 'corruptors' by bringing them under the mischief of the anti-corruption law.

Provision is proposed to be made for empowering the police to inspect bankers' books and to take certified copies of the relevant entires in the course of investigations into suspected offences of corruption. As a measure of precaution, it will be provided that these powers shall not be exercised by a police officer whose rank is less than that of of Superintendent of Police.

WELFARE OF TEACHERS

In a message on the occasion of the Teachers' Day, which is being celebrated today, synchronising with the birthday of President Radhakrishnan, Prime Minister Shastri has reminded the nation of its duty to the teacher. "He plays the most important role in the community's crusade against ignorance and illiteracy. His interests, social as well as financial, must, therefore, be looked after by the community."

Union Education Minister Chagla, in a broadcast talk yesterday, said that education in our country will never make progress unless we recognise the fact that teachers are as important members of society as those who work in administration, business or industry. We may not be able to give all the advantages and benefits which people working in other professions receive, but we must lay down a minimum to which every teacher should be entitled.

FLOOD HAVOC

The floods in the country have damaged crops estimated at Rs. 19 crores and affected 53 lakh acres of which 23 lakh acres are under crop.

The floods have affected 15,500 villages and accounted for the destruction of 50,000 houses worth Rs. 52.9 lakhs.

Brains Trust

Prime Minister Shastri has suggested the formation of some kind of a national council to assist the Planning Commission.

His intention is to draw on the services of well-known experts in different fields on a part time basis.

The Prime Minister has also suggested a three-year tenure for members of the Planning Commission. In his view, the commission will stand to gain by taking new people every three years.

SUGAR FAMINE IN CITY

Mysore, Sept. 7

Sugar, sugar is the cry heard everywhere in the City.

Though the authorities claim that the card system has been introduced for sugar distribution in the city from the first of this month, most of the people have not received the cards. With the result, the people cannot buy sugar anywhere.

It is estimated that there are 50,000 sugar cards for Mysore City. With the maximum efforts it will take at least a minimum of 30 days to distribute those cards.

The official press note issued claimed that the cards will be distributed before Sept. 5. Even today only a few have received the cards.

Lord Ganapathy, this year, is to go without sugar.

Will the authorites take immediate action to see that sugar is sold in the market, pending the distribution of sugar cards, so that the people can celebrate the Ganapathy festival with sugar?

Sugar Card System

CITY FATHERS' CRITICISM

Mysore, Sept. 7

The Opposition members, at the Municipal Council, on Saturday, vehemently criticised the procedure and the irregularity in the distribution of cards for sugar in the city.

Sri Srikanta Sharma moving an adjournment motion said that each society had been given about 200 cards for distribution. The persons to whom the cards were to be distributed did not belong to one area. He said as the festivals were coming, immediate measures to distribute sugar should be taken.

Sri Vedantha Hemmige said that nearly 75 per cent of the cards had not been distributed and many had been omitted in the list. As there would be procedural delay in including their names and distribution of sugar, he pleaded that the old procedure should be restored until proper distribution of cards was made.

Sri L. Chikkarangappa also spoke supporting the motion.

The Congrees members, Messrs. Anantharamiah, D. Lingiah, B. C. Lingian and K. Siddiah, said that there was no need to adjourn the house. Instead they could suggest measures to rectify the irregularities. They said that blank cards had been given to societies to distribute them for those whose names had not been included. Sri K. Siddiah suggested that atleast one week quota should be immediately allotted to societies to enable them to distribute the same as previously to provide people with sugar to celebrate the festivals. Later the new system could be implemented.

Sri B. C. Lingiah said that the Deputy Commissioner had assured proper supply of sugar within Sept. 9.

On the assurance of the acting-President Sri Abdul Gaffar that the suggestions of the council would be communicated to the authorities, the adjournment motion was not pressed.

The Council adopted two resolutions moved by Sri B. Baliah for opening a dispensary and a post office in Kailaspura and Budabudakeri in Mysore City.

VII Standard Passes A Farce

Bangalore, Sept. 15

Sri T. Vasudeviah, Director of Public Instruction stated yesterday that the high percentage of passes in the seventh standard was a farce when compared with the low percentage of success in the final year examination of the secondary schools.

He said one of the causes was the tendency to push up the percentage of passes in the seventh standard. The roport of the Study Team on Five Year Plan Publicity, which was placed on the table of both the Houses of the Parliament has found that the impact on the people of the existing publicity programmes has been tenuous, vague and diffused in content with no section of the community having been touched in a forceful manner. It has failed to generate an atmosphere of urgency in achieving national goals because it had rarely been organised in the form of nation-wide planned campaigns on war footing. It not only lacked purpose and strategy but has been weak in approach.

Stress On Minor Irrigation Works

Mysore, Sept. 19

Public Works Minister Veerendra Patil yesterday declared open a feeder channel at Bolenahalli and a tank at Madrahalli in Pandavapur taluk.

Sri Chenniah, Superintending Engineer, welcoming said that they were constructed at a cost of Rs. 12.40 lakhs and would irrigate 738 acres.

Sri Neele Gowda, MLA, presided.

The Deputy Commissioner of Mandya, Sri K. Lakshmanarao presented a 'sannad' to Sri Gowde Gowda for planting over 450 trees for a distance of 2 miles between Pandavapura-Suntatonnur.

The Public Works Minister said that the Government had given more attention for minor irrigation schemes. It had already spent over Rs. 9 crores. A Rs. 15 crore scheme was under preparation for minor irrigation works. The Government was particular of taking up projects which would irrigate 200 to 300 acres and completed within 2 or 3 years. The Central Government had assured financial help, he said.

He appealed to the ryots to make best use of the irrigation facilities and said if they came forward to pay their taxes and betterment levy quickly, more such works could be undertaken.

Sri Patil said that the present scarcity was also due to the change over to commercial crops from food crops. He said attention to the growth of food crops was also necessary.

He appreciated Sri Gowde Gowda's work and said the Government was intending to put about 29,000 avenue trees which would yield some revenue. He appealed to the villagers to undertake similar works.

Sri Chikkanna, Executive Engineer, Mandya Division, proposed a vote of thanks.

At Chennahalli in Srirangapatna taluk, the Minister opened two bridges constructed at a cost of Rs. 49,000 and Rs 77,000 respectively. Sri A.G.Bandi Gowda, MLA presided.

Sri Veerendra Patil said that in Mysore State only 6 acres out of 100 had irrigational facilities and the remaining had to depend upon rains. Therefore there was need for more irrigation works.

CAUVERY WATER

Referring to the Cauvery water agreement with Madras, he said that it would come to an end in 1974. Before that, the State had to use all the water allocated to it. He regretted that 'we are only still trying to make use of the waters whereas Madras had already made use of its allocation.' The Government needed Rs. 50 to 60 crores to make use of all the water allocated to it. He appealed to the ryots to make best use of the water.

The Minister said that about 9,000 miles of roads had to be taken up from the District level. So far 7,525 miles had been taken up. The budget allocation was limited to Rs. 20 lakhs and hence only important roads would be taken up.

Food Crisis Will Be Met

Prime Minister Shastri told the Lok Sabha that he expected 'difficult days' in regard to the food situation, at least for the next two months. He, however, had no doubt that Government would be able to tide over the present difficulties without any serious trouble.

Sri Shastri said, at the present moment, however much 'we may dislike imports of foodgrains from abroad', there was no escape from it.

To make the State Governments pay attention to increasing food production, the Prime Minister favoured the Centre taking responsibility for food supplies to metropolitan and other big cities and requiring the State Governments to find food for the rest of the population. He announced that Government would be prepared to subsidise foodgrains sold at the fair price shops as much as possible. He said in 1961, the Government subsidy was Rs. 16 crores and it increased to Rs. 37 crores in 1963 and in the curent year it might go up to Rs. 50 crores.

The Federation of All-India Foodgrains Dealers' Association yesterday blamed Government policies for the present food crisis and strongly opposed the establishment of the foodgrains trading corporation in the public sector.

By another resolution, it urged the Government to take steps to ensure that the country attained the production of 100 million tons per annum in the remaining two years of the Third Plan.

On the question of profit of margin, the federation said Government should take into consideration all the factors and increase the present gross margin of profit substantially since costs had gone up considerably.

DEVELOPMENT OF MYSORE DISTRICT

DCC MEMORANDUM TO C.M.

Mysore, Sept. 22

The Mysore District Congress Committee has submitted a memorandum to the Chief Minister urging him to take up major and minor irrigation works and also locate some industries in Mysore district.

This memorandum was prepared at a meeting of the Congress Legislators and Presidents of Taluk Boards of Mysore district held under the auspices of the District Congress Committee.

Sri D. Suryanarayana and Sri Hejjige Linganna, President and Vice-President of the DCC respectively, explained the salient features to the newsmen yesterday.

The memorandum urged the Government that the major irrigation works of the district--Kabini and Suvarnavathi projects--should receive a top priority. In order to expedite the work of Rs. 15-crore Kabini project the Government was asked to allot Rs. 3 crores a year. The Kabini project when completed would irrigate 1,27,000 acres.

The Committee requested theGovernment to take up the other projects like the Lakshmanathirtha, Tharaka, Guudlu, Thattehalli and Uduptor.

In the interest of maximum utilisation of the Cauveri waters, the Committee felt that the Government should take a firm decision regarding the location of the Harangi project site in Coorg district and take np the work early.

It regretted that no action had been taken for the Kambadakada project which had been included in the Third Plan. The Committee urged the Government to take up the project since this was the only project that could be thought of for the full utilisation of the waters of the Cauvery. Food Trade Not Behaved Well

—SAYS C.M.

Bangalore, Sept. 28

Chief Minister Nijalingappa stated here yesterday that the price fixation order fixing maximum selling prices for foodgrains had not yielded the expected results. The main reason was the inadequate co-operation by merchants. The merchants by and large had not behaved well, he said.

Sri Nijalingappa said the Chief Ministers and Food Ministers would be meeting in Delhi on Oct. 29 to discuss the mutual relationship of the State Governments with the Central Foodgrain Trading Corporation to finalise the policy regarding procurement of foodgrains and price levels.

The State Government would formulate proposals regarding the procurement policy and the prices to be fixed for paddy in the ensuing bumper by the second week of October, he added.

Sri Nijalingappa said that in future, the Government might itself undertake procurement and distribution directly or through co-operatives to meet the food problems.

Mysore's trouble would persist only for the next couple of weeks. With the new harvest round the corner, the position would improve, he said.

Referring to rice position, he said "I am sure there are sufficient stocks with the merchants". The Government was taking firm measures to bring out the hidden stocks. The Union Government had promised to send adequate quantities of rice. Howerver so far Mysore had not received as much of rice as it should have. MYSORE BUILDING TAX ACT INVALID

HIGH COURT'S RULING

Bangalore, Sept. 29

The Mysore High Court yesterday struck down The Mysore Buildings Tax Act of 1962 which purports to levy tax on the basis of floorage of buildings in urban areas with a view to mop up a portion of 'the money' for the exchequer.

Sri Justice Hegde and Sri Justice Govinda Bhat held that the classifications of buildings envisaged in the Act for the purpose of levy was violative of Article 14 of the Constitution.

In a batch of 54 writ petitions, building owners from all over the State had challenged the validity of the Act.

Section 4 of the Act charged all buildings in the towns listed, classifying 121 towns into 3 categories. Values of sites differed from place to place in every town and also from town to town. Values also varied from buildings to buildings. Under the Act both cow-sheds in a slum and an ultra-modern cinema house in a best locality were taxed the same amount if the extent of the floorage was the same.

Sri Jusitce Hegde said: "I have not come across any treatise on public finance wherein taxing buildings for raising public revenue on the basis of floorage is even contemplated. The floorage basis is not only unscientific, it is something arbitrary and mechanical. It does not confirm to any known principles of taxation."

His Lordship said that there was no substance in the plea that by defining in an artificial manner, the Act had not only purported to tax the buildings as such but also had brought within its net some other assets, which were not really buildings. The contention that the levy was not a tax on buildings but on the income of the assets of the owners had no merit. He observed "all taxes, whether levied on income or on assets or any other object, have to be ultimately paid by the same human being".

He held that the Act could not be considered as colourable piece of legislation but he however assailed the classification on the basis of floorage as being irrational.

Sri Justice Govinda Bhat held that the pith and the substance of the Act was a capital levy and therefore it was unconstitutional and hence void.

He observed that the basis of the Act had no reasonable correlation of the value of the buildings to the assessee. Therefore it violated the fundamental right guaranteed under Article 14 and 19 and was inconsistent with the part 3 of the Constitution.

The Act allowed local authorities to retain collection charges and to pay 90 per cent of the collections to the State Government for the use of the State. Entry 49 in the State List had imposed constitutional limitations on the legislative power of the Srate to levy tax on buildings, except on the nominal basis of the annual rent or any other reasonable standard of apportionment of the tax burden and such tax should be levied only for the exclusive utilisation of municipalities.

His Lordship held that the State Government was not entitled to levy tax on buildings and lands under entry 49 of the list 11 except for the benefit of local government.

He disagreed with the view of Sri Justice Hegde that the Act was not a colourable piece of legislation. His Lordship observed that the very fact that a separate Act was enacted to impose the tax for State purposes, showed that interests of the legislature was to take part of wealth of the property owners in the State. Therefore, it was a colourable piece of legislation.

SC STRIKES DOWN MYSORE APPOINTMENTS

The Supreme Court yesterday set aside as not proper the appointments of 40 candidates by the Mysore Public Service Commission to certain State services.

Sri Justice Hidayatullah said 'It seems surprising that theGovernment should have recommended as many as 24 names and the commission should have approved of all those names without a single exception even though in its own judgment some of them did not rank as high as others they (the commission) had rejected.'

His Lordship said "it is very unfortunate that these persons should be uprooted after they had been appointed but if equality and equal protection before law have any meaning and if our public institutions are to impose that confidence which is expected of them we would be failing in our duty if we don't allow these petitions.'

The court allowed Partly 55 writ petitions filed by Sri C. Channabasaviah and other candidates.

JUDICIARY SUPREME OVER LEGISLATURE

SAYS SUPREME COURT

The Supreme Court yesterday expressed the opinion that Judges of the Lucknow bench of the Allahabad High Court had not committed contempt of the State Vidhan Sabha in passing an interim bail order in the case of a citizen even though his commitment had been ordered by the House.

The opinion of the court was delivered by the Chief Justice, Sri Gajendragadkar, in a special reference by the President.

The court answered all the five questions contained in the reference to the effect that neither the judges of the Allahabad High Court, nor Sri Keshav Singh, a socialist worker who moved the court in a habeas corpus petition against his committal by the Vidhan Sabha nor Sri B. Solomon, his Advocate, had committed contempt of the House.

On the third question, the Supreme Court answered that the Assembly was not competent o direct that the two jndges of the High Court and Sri Solmon be produced before the bar of the House.

The full bench of the Allhabad High Court was competent to entertain and deal with the petition of the two Judges and Sri Solomon and to pass interim orders restraining the Speaker of the Vidhan Sabha from implementing the direction that the Judges be produced before the bar of the House.

Nor did a judge who passed an order in a petition challenging any order or decision of a Legislature commit contempt of the legislature and legislature was not, therefore, competent to take proceedings against such a judge.

After referring to the late Mr. Nehru's call for peace, President Nasser spoke of the lessening of tension in the world since Belgrade but rejected outright the theory that because of that, the non-aligned countries had no role to play now.

He said the 'unstable truce' of today had to be turned into a 'lasting peace' for tomorrow.

'Our final objective is peace based on justice. In its final form, the attitude of non-alignment is a policy of seeking peace on the basis of justice', President Nasser said.

A silence in memory of people who fell in the struggle for freedom started the day's proceedings.

MARRIAGE IS OFFICIAL AFFAIR IN CHINA

Marriage has ceased to be a personal matter in China since the advent of the Peking regime; but now it has gone a step further. As in the case of admission to schools and colleges, even in the field of marriage China has imposed age restriction.

Thus, in every field of activity, private or public, the age restriction is a new device of the Peking by which it aims at denying opportunities to the people, particularly to those who are not amenable voluntarily for Party regimentation.

Young people who plan to get married before 30 years of age are criticised by Peking as "ideologically backward".

The result is that crime has increased at an alarming rate in the past few years. The number of cases in which severe punishment has been meted out to the young lovers has also increased.

Varsity Youth Festival

Mysore, Oct. 8

The three-day inter-collegiate youth festival, organised by the Mysore University, was inaugurated here this morning by Prof. T.N. Srikantiah, at the Centenary Hall.

About 38 colleges are participating in the festival.

Dr. Hegde, Principal of the Yuvaraja's College welcomed the gathering.

The Vice-Chancellor, Dr. Shrimali, who presided said that the festival-revived after five years, would give a great opportunity to students to express their talents and abilities. The festival would also help students to meet together, to live together and develop friendship and commardeship, which would stand for ever in the their future life.

Dr. Shrimali cautioned against exposing of their quarrels and differences to the public and they should be confined to the university campus.

The Vice-Chancellor said University was a place where students spend most of their impressionable time of their life. The most important influence derived by the University was culture, learning and education. INTER-STATE RICE TRADE TAKE-OVER IN SOUTH

The Government of India has decided that inter-State trade in rice in the Southern Zone should be on Government-to-Government level, so that the problem of profiteering by traders can be tackled effectively.

This was one of the recommendations made by the Chief Ministers of Mysore, Madras, Kerala and Andhra Pradesh at a meeting held on Sept. 26.

Deficit States of Mysore and Madras had complained that private traders disposed of stocks procured from Andhra Pradesh for high profits to bigger deficit areas, creating a problem. The Kerala Government also faced the problem of profiteering in rice by the private trade.

Hereafter there can be no flow of rice from one State to another on private account and it should be possible for States to keep a check on wholesalers.

Each State will be cardoned off for the purpose of inter-State movement of rice. Movement from Andhra to Madras, Kerala and Mysore will be State-sponsored. All movement of rice into Kerala will be on Central-account.

China Rejects

The Chinese Government's latest statement on the Sino-Indian border dispute was described by a spokesman of the External Affairs Ministry as a re-affirmation of the rejection of the Colombo proposals by China.

The Chinese statement while affirming that she would always welcome the efforts of the Colombo Six at impartial mediation, would never submit to any international pressure and it would not agree that the Colombo proposals should be regarded as an 'arbitral award to be accepted by China in toto'.

It also stated that India was fully aware that China would not agree to its unreasonable demand for China's withdrawal from the seven civilian posts as a pre-condition for negotiations.

INTENSIVE IRRIGATION URGED

The Centre has asked the States to review the existing major and medium irrigation projects and to switch over from extensive to intensive irrigation.

The Centre and the Planning Commission think that agricultural production would not increase sizably unless there is intensive irrigation.

APPEAL AGAINST NUCLEAR TESTS

India is not likely to press Prime Minister Shastri's suggestion that the non-aligned conference should send a special mission to China to urge her to desist from undertaking nuclear tests.

But the conference was expected to make a special appeal to all non-nuclear powers, including China, to refrain from producing nuclear weapons and from carrying out any nuclear tests or explosions.

MYSORE RICE POSITION NOT GOOD

Chief Minister Nijalingappa told newsmen yesterday at Madras that the rice position in Mysore was not good. Now 3,500 tons of Andhra rice had been allotted to the State from Eluru in West Godavari district and arrangements had been made for moving these stocks.

He said Mysore could not build up buffer stocks during the past few years because of poor crops. This year the State would surely build up a buffer stock.

Food Minister Krishnappa stated Andhra rice allotted to Mysore would be moved in four or five days.

Nail Artist In Mysore

Mysore, Oct. 12

It is fascinating to see the 41-year-old Sampathkumar of Hyderabad drawing a sketch of a figure with the nail of his finger or expertly cut a silhouette with a tiny pair of scissors.

The nail-artist who hails from Hyderabad and now staying in Madras told the 'Samachar' that he learnt the art 20 years back.

In 1954 the late Prime Minister Nehru evinced keen interest in his nail drawings at the Madras Exhibition. In 1958 the Government of Madras awarded a gold medal to the artist. Last year, President Radhakrishnan awarded a cash prize of Rs. 100 to the artist for the nail drawing of the President.

He had done nail sketches of various distinguished persons like General Cariyappa, Sri S. Nijalingappa and the Governors of Madras and Kerala.

He is giving demonstration of the art now at the Mysore Dasara Exhibition.

IN UNITY LIES STRENGTH

Prime Minister Shastri told the closing session of the Non-aligned Summit Conference that common adherence to certain principles and policies had bound them together and 'in our unity lies strength'.

He said 'united, we can help to shape the future and to ensure a more just and equitable world order in which plenty and progress would prevail for the benefit of mankind'.

Chagla Cautions Against Cut

IN EDN. OUTLAY

Bangalore, Oct. 12

Union Education Minister Chagla yesterday cautioned planners against any slash in the outlay for education and said it would land the country in a national calamity.

He warned that any slowing down in the expenditure on education, would also slow down the economic progress of the country.

It was only education that could produce first class human material to take care of the several development projects being shaped in the country.

In his inaugural address to the 31st session of the Central Advisory Board of Education, Sri Chagla pointed out the bungling of States in the language formula, the reluctance of the State Governments to place at least higher education in the concurrent list and the hesitation of some of them to agree to the institution of an all-India education service.

The Education Minister reminded the Chief Ministers that any haste in switching over to regional languages without in the meanwhile developing a link language would lead to serious consequences and impair the very integration of the country.

Whether this unifying language should be English or Hindi was an explosive problem and he would rather leave it to the expert judges to evolve an acceptable solution.

Sri Chagla also refferred to the tremendous backlog of teachers and called upon the State Governments to give immediate priority to train untrained teachers. He assured full Central support to such schemes and said that the Government had just sanctioned a project to train teachers in their own home.

He reminded the Governments that unless they did something to enhance the emoluments of teachers, they could not expect them to do their duty by the community truly and well.

Expressing the conviction that the education of women was even more important than that of men, Sri Chagla called for a merciless demolition of all inhibiting factors impeding its progress.

STATE BORDER TO BE SEALED

Bangalore, Oct. 12

He said that the State Government would very soon announce certain rates for the commodities which the Government was going to purchase. He warned the merchants that if they clung to their stocks they were in for a hard time.

Co-Existence Necessary

SAYS NON-ALIGNED MEET

The Non-Aligned Summit Conference of 47 nations which concluded yesterday at Cairo declared that peaceful co-existence between States with differing social and political systems 'is both possible and necessary', apparently rejecting Peking's estreme approach to international life.

In a 9,500-word declaration, the leaders pledged their readiness to abstain from manufacturing, acquiring or experimenting with nuclear weapons and invited all countries to subscribe to a similar undertaking.

The conference declared that States must abstain from all use of the threat of force against territorial integrity and political independence of other States.

'A situation brought about by the threat or use of force shall not be recognised', it said.

The communique called for 'unconditional complete and final abolition of colonialism now'. It condemned all colonialist and neocolonialist policies applied in various parts of the world.

All international conflicts must be settled by peaceful means in such a manner that justice and legitimate rights are not imparied, the declaration said.

It recommended the U.N. General Assembly to adopt the declaration on the principles of co-existence.

INDIA'S SUCCESS

India has every reason to be satisfied with the measure of success it attained and the suppot it received at the second Non-aligned Summit Conference at Cairo.

Ban Unlicensed Edn. Institutes

Bangalore, Oct. 13

The Central Advisory Board of Education meeting here yesterday recommended that in future, all professional colleges should be started only by the Government.

It also recommended that States should legislate to ban unrecognised institutions from conducting examinations and awarding diplomas or certificates.

Union Education Minister Chagla stated that no person should be allowed to start educational institutions, including private tutorials, without the prior permission of the Government.

He said starting institutions without permission should be made a penal offence. A model legislation in this regard would be sent to the States soon, he added.

The Education Minister said the Board had also condemned unethical institutions and had asked the universities to disaffiliate them, if they did not conform to standards. By unethical institutions, he meant, those that were started for profit. He meant the capitation fees charged by private institutions which were intended to benefit the children of the rich. The principle of capitation fees was opposed to socialism and the egalitarian society they sought to build.

Sri Chagla said the Government would start a large number of colleges in the Fourth Plan where there is need for more technical and professional colleges. If there are enough colleges, the question of capitation fees does not arise, he added.

The conference appealed to the countries which have not signed the test ban treaty to do so immediately'.

FOURTH PLAN OUTALY 21,500 CRORES

The Union Cabinet yesterday approved the preliminary memorandum providing a firm outlay of Rs. 21,500 crores at 1963 64 prices for the Fourth Plan.

The targets of public sector outlays have however been worked out on the basis of an outlay of Rs. 22,500 crores with the provison that the resources amounting to Rs. 1,000 crores could be raised depending on the availability of additional resources.

However, a final decision on the size of the fourth plan will be taken by the National Development Council which will meet at Delhi on Oct. 27.

The bulk of the additional investment would be on industry, transport and power.

The draft marks a relative increase over the Third Plan allocations of agriculture, education and health, a marginal increase in small industry and a drop in the public sector industry power and transport.

Even an outlay of Rs. 21,500 crores would call for an additional resources of about Rs. 3,000 crores through tax and non tax measures.

There would be no deficit financing in order not to aggravate the price situation further. Maintenance of stable price levels would be given the highest priority in the next plan. It would be done by giving fillip to quick-yielding schemes, regulatory measures by assuming administrative responsibility and strict dicipline in expenditure.

External assistance for the Plan is assumed at Rs. 2,500 crores.

The investment in the private sector has been agreed at Rs. 7,000 crores.

It has been strongly emphasised that States would have to launch a much more vigorous drive for resource-mobilisation than in the current plan.

"China exploded an atom bomb in the western region of China at 3 p.m. (Peking time) on Oct. 16 and thereby conducted successfully its first nuclear test".

The Government statement said that China was 'forced' to conduct nuclear tests and develop nuclear weapons. 'China cannot remain idle and do nothing in the face of the ever increasing nuclear threat by the U.S.'.

It declared that China would never be the first to use a nuclear weapon while adding that the nuclear test was a major achievement for the defence of the country and in the cause of world peace. The atom bomb 'is still a paper tiger', the statement said.

China became the fifth nuclear power. The others are America, Russia, Britain and France.

CABLE FACTORY IN MYSORE CITY

Mysore, Oct. 17

Sri H. C. Dasappa, Union Minister for Heavy Industries stated here yesterday that the question of locating a tele-communication cable factory in Mysore City was on the anvil.

Addressing the members of the local Chamber of Commerce and Industry, the Minister regretted that neither the State Government nor the industrialists of Mysore City had put up before his Ministry any concrete scheme for the development of the City. He asked the industrialists of the City to name the major industry they wanted in the City.

Sri Dasappa envisaged the possibilities of industrial expansion in Mysore City if incessant efforts were made by entrepreneurs. He was glad that two food processing industries were likely to come up in Mysore City.

He said a most modern rice mill would soon be started in Mandya.

Sri K. Puttaswamy, Minister for Municipal Administration while stressing the need for industrialisation of Mysore City, felt that unless agriculture was made an industry, and mechanise it, the country could not solve its food shortage.

Sri Rahamathullah, Secretary in the State Industries and Commerce Department said that a ten-mile belt had been earmarked at Bangalore for starting new industries. He also said that Mangalore had been selected to locate the fertiliser factory.

No Change In Policy

The Soviet Communist Party newspaper 'Pravada' indicated that the party will continue to carry out policies of de-Stalinisation and economic improvements under its new leadership.

The New Premier, Mr. Alexei Kosygin (60) and the new party Secretary, Mr. Leonid Brezhnev have been closely associated with Mr. Khrushchev during most of his eleven years as Russia's strongman.

It was considered significant that neither of the two Tass announcement paid tribute to Mr. Khrushchev's past services.

Washington appeared to be taken completely by surprise by the developments in Moscow. President Johnson said that Premier Khrushchev's replacement may or may not be a sign of deeper turmoil or may be a sign of changes in policies to come'.

The Government of India looks forward with confidence that the friendly ties now existing between India and the Soviet Union will continue and grow stronger under the Soviet new leadership.

Police had to make a lathi charge to disperse the angry mob which hurled stones at the police party and officials of the godown when the latter refused to sell foodgrains to non card holders

When officials of the godown, finding the situation uncontrolable attempted to close the doors, the crowd protested and forced its way into the godown. They removed foodgrain bags and other articles.

A posse of armed police came on the scene and dispersed the crowd.

FOOD ENGINEERS' RESPONSIBILITY

Union Irrigation Minister Rao yesterday placed the responsibility of food production on engineers.

He said that India produced about 80 million tons of foodgrains every year and they were only short of about five million tons. At the present rate of growth of population in the country, they would be requiring 100 million tons of foodgrains by 1970. 'If all the minor and irrigation projects are implemented this target can be achieved'.

SEPARATE PLAN FOR AGRICULTURE

A separate plan for agriculture embodying two 'cycles of quick-yielding schemes' each of two-and-a-half-years' duration would be drawn up as part of the Fourth Plan, stated Sri Asoka Mehta, Deputy Chairman of the Planning Commission.

Failure In Agrl. Sector

The Planning Commission has admitted that performance in the agricultural sector has been woefully short of expectations.

It said the failure was largely responsible for limiting the increase in consumption standards of people and for the abnormal increase in prices.

The note said that although aggregate investment targets would have been achieved in financial terms, several physical targets of production and capacity set for the Third Plan would not be reached by 1965-66.

However, a large part of the economy investments that have been undertaken would start yielding the expected benefits in the initial years of the Fourth Plan.

National income has gone up by less than ten per cent in the first three years of the Plan as against the increase of about 30 per cent assumed for the five-year period up to 1965 66.

With better performance, especially in the agricultural sector in the remaining years of the plan period, the Commission feels the national income in 1965-66 may be around Rs. 17,400 crores rather than Rs. 19,000 crores.

USE IRRIGATION POTENTIAL

Union Irrigation Minister Rao has called for full utilisation of the irrigation and power potentials for achieving self-sufficiency in food and rapid industrialisation of the country.

In the context of the present food shortage, he said, greater attention should be paid to the early execution of irrigation projects.

The irrigation and power sector with a total outlay of Rs. 1,750 crores in the Fourth Plan had an important part to play in the achievement of national development and sustained growth of the country's economy.

He said 'our programme for the Fourth Plan has to be given careful consideration even now and advance action initiated'.

Preplanned To OustKhrushchev

Mr. Nikita Khrushchev was brought back from vacation virtually under arrest to face the Communist Party meeting that ousted him from power on Oct. 15. it is stated.

Five officials of the Soviet Secret Police were sent from Moscow to get Mr. Khrushchev after he argued over the telephone against attending the meeting.

The meeting had been carefully arranged in advance. The charges were drawn up-bungling in the China dispute, industrial and agricultural failure, personal excesses and the 'cult of personality'.

Since that time a week ago, Mr. Khrushchev has been under restrictions on his movements, amounting to house arrest. He is belived to be in the Moscow area, although different sources conflict on exactly where.

The sources said Mr. Khrushchev's opponents on the presidium alerted the central committee in advance and that some members were warned about two weeks earlier.

The presidium majority apparently feared Mr. Khrushchev would try to repeat the tactics he used to overthrow the anti-party group in 1957 when he was reportedly outvoted in the presidium, but then called an emergency session of the central committee to over rule the executive group.

Mysore Fails In Food Target

Bangalore, Oct. 23

The industrial sector has made better progress than the agricultural sector during the first three years of the Third Plan in Mysore State, according to an official assessment,

Although it was expected that at the end of the Third Plan period, Mysore may achieve self-sufficiency in foodgrains, the position, as at present, makes it clear that the production target is not possible to be achieved completely.

In 1961 62, the production of foodgrains and non-foodgrains did not show any improvement over the previous year and actually displayed a slight declining trend.

In 1961-62, the foodgrain requirements were estimated at 41.54 lakh tons while the level of production was 38.67 lakh tons, leaving a gap of 2.87 lakh tons.

Production in 1961-62 reached the level of only 39.81 lakh tons as against the requirements of 42 lakh tons. The partially revised estimate for 1962-63 has placed the output of foodgrains at 41 lakh tons, as against the estimated requirements of 42 53 lakh tons.

PM's Love For Village

Sri Shastri would prefer to function as Prime Minister from a village rather than a sprawling metropolitan city like Delhi.

He told a villagers' meeting in Uttar Pradesh that no suitable area was available for the purpose within 12 to 15 miles of Delhi. 'Even the villages have become big towns there'.

Sri Shastri said his attachment to the rural area had long been and unforgettable. The office he held entailed certain limitations and made his wish to function from a village impossible.

Buffer Stock Plan In Mysore

The Mysore Cabinet yesterday discussed the disturbing food situation in the State.

Chief Minister Nijalingappa told newsmen that he felt that the difficult situation might continue for a month or two, when the new crops of jowar and paddy would start arriving in the market.

He described the seasonal conditions this year as better than those of the previous two years and assured the people that the Government would do its best to build sufficient reserve stocks of foodgrains.

The Chief Minister said: 'We are making arrangements to purchase paddy at rates which will be sufficiently encouraging to the producer and not hard on the consumer'.

He added: 'Not only have we to prevent food going out of our State by sealing our borders, but we have also to see that sufficient stocks are obtained from States which are our traditional suppliers and also from the Centre'.

NO ALTERNATIVE TO RATIONING

Prime Minister Shastri yesterday stressed the need for reducing and stabilising the prices of foodgrains to see through the critical period.

He said if food prices were not controlled, the entire economy might crash.

It was, to a certain extent, correct that rationing and control might lead to corruption among the administrative machinery but Government had to choose the lesser evil, he said.

CALL FOR NUCLEAR DISARMAMENT

President Radhakrishnan yesterday called upon the people to 'work for complete nuclear disarmament. Our enemy is war, not this or that nation', he said.

He said it was most unfortunate that China should have exploded a nuclear device recently. China, he said, should be brought into the U.N. so that 'the proposals for the banning the nuclear weapons and information might have some effect on it'.

CENTRE NOT TAKING OVER I-PROJECTS

The Planning Commission is opposed to a demand made by States that large irrigation projects be financed by the Centre and kept outside the State Plans.

The Commission feel that the difficulty due to increase in the cost of projects will not be solved by keeping them outside State plans-it merely gets transferred from the States to the Centre.

TOTAL WAR ON FOOD PROFITEERS

SUMMARY TRIAL OF OFFENDERS

SHASTRI'S CALL TO CMs

Prime Minister Shastri yesterday called for a total war against food profiteering by summary trial of those who sell foodgrains at prices higher than those fixed by the Government.

Addressing the State Chief Ministers' Conference, Sri Shastri said the State Governments must deal with delinquent traders effectively and quickly.

He said every district should have one or more judicial Magistrates enjoying special powers. They should dispose of the cases the same day or at the most in two days. They should be no prolonged procedures for hearing cases.

At the summary trial, he said, heavy fines should be imposed and traders' licenses cancelled. All shops should be licensed and it should be ensured that they sold foodgrains at fixed prices. Any breach should be dealt with effectively and immediately and such shops should be closed.

Unless this was done, no scheme of control and rationing could succeed, he warned.

The Prime Minister said: 'These steps have become absolutely essential because I have come to the conclusion that the traders are not prepared to co operate with us. They want complete freedom. We might have taken that risk but I find that if we leave to them, they will not play the game. Therefore, if we decide to go in for rationing, we should simultaneously be clear in our minds and resolve that we will take effective action in order to implement our programme successfully'.

Sri Shastri said he was one of those who generally opposed controls and regulations. Though he was trying to see if the Government could regulate the food position and stabilise it without introducing rationing or controls. This had not happened. It had, therefore, become essential that they should take the present situation into consideration and decide upon the future line of action. Although controls might lead to corruption, they had to choose the lesser evil.

5-POINT PLAN TO TACKLE FOOD ISSUE

The Chief Ministers' Conference yesterday had inconclusive discussions on the proposals put forward by the Union Food Ministry to tackle the food and price situation.

The proposals included cordoning off Bombay, Calcutta and other cities with a population of ten lakhs or above for statutory rationing purposes; cordoning of Kerala where the food problem is particularly difficult; introduction of informal rationing in urban areas with a population of lakh and above; statutory rationing in industrial cities and the revision of issue prices in fair price shops of imported wheat and rice.

PM's APPEAL TO PEOPLE

Prime Minister Shastri yesterday appealed to the people to go without rice for at least one or two days in a month. He said since rice was much more difficult to import than wheat, people should make some sacrifice.

Sri Shastri said that even in the rice eating States, the people could do with bananas or something else for a day or so each month.

In the districts, the Deputy Commissioners have been given all powers to deal with the situations as they deemed fit and to requisition stocks if necessary.

Sri Shastri said that only if the public sector launched out in these directions, it would be possible to ensure that the shortages experienced in respect of these commodities in the recent past did not become chronic. It would not only bring profits but also create large employment opportunities.

He said that a high-power national planning council consisting of scientists, engineers, economists and other experts would be constituted soon.

It would advise the Planning Commission in the formulation of the Fourth Plan.

T.T.K. ASKS STATES

Union Finance Minister Krishnamachari yesterday told the National Development Council that the States would have to make progression in taxation as part of the efforts to mobilise resources of the order of Rs. 2,500 crores to Rs. 3,000 crores for the Fourth Plan.

He said the questions that had to be faced were rationalisation of tax structure, avoiding tax evasion, including evasion in sales tax, and consideration of the possibility of getting benefits by increase in agricultural incomes. A smaller tax in some cases would have a cumulative effect of checking tax evasion.

The Finance Minister suggested the Chief Ministers to examine the question whether theCentre should take over certain projects so that the principal and interest thereon were added together and benefits accuring there from were also made available to the centre.

ORDINANCE TO CRUSH HOARDERS

Prime Minister Shastri yesterday disclosed in the National Development Council meeting in New Delhi that an Ordinance would be issued soon by the Government to deal with hoarders and profiteers in essential commodities.

He said that "food is a matter of life and death. We connot afford to take chances in this matter".

Referring to the "quickly changing international situation, the Prime Minister said that the Centre and States should put up a united front. "We should give the impression of a united integrated country".

Sri Shastri asked the States not to make too much demands on the Centre. The States should not insist on large-sized plans for them.

While science and technology were important and should be pressed to the service of the nation, he emphasised that they should not overlook the "Swadeshi" spirit.

The Prime Minister said that he had suggested controls and rationing so that "we can give the people food at reasonable prices".

In order to make these successful, it was essential for the Government to assume sufficient power to deal with those who went against the wishes or instructions of the Government".

It was, therefore, proposed to promulgate an ordinance to deal with those who indulged in profiteering. Power should be exercised in the interests of the people and the feeling should not be allowed to grow that the Government said something and did not act up to it.

No Change In Soviet Aid

Russia's new Prime Minister, Mr. Alexei Kosygin, has assured Smt. Indira Gandhi, who is now on a visit to Moscow, that there will be "no change" in Soviet economic, technical and other aid for India.

There was no truth in reports that Mr. Khrushchev had been criticised for giving military aid to India during India's 1962 border war with China. Mr. Khrushchev's policy towards India was not a factor in the charges levelled against him by other Soviet leaders before he was replaced two weeks ago, it's is stated.

The Soviet support for India's policy on Kashmir would remain unchanged, it is reported.

Johnson's Pledge To Preserve Peace

The new U.S. President, Mr. Johnson, in a statement issued yesterday undertook to continue all his efforts for the maintenance of peace in the world and to preserve the prosperity of the United States.

Mr. Lyndon B. Johnson, who was elected President of the United States for next four years, will be the first Southerner to occupy the White House.

Republican opponent Senator Barry Goldwater finally made a formal concession of his defeat.

Many traditionally Republican States joined the eastern seaboard States to give Johnson a landslide victory.

His tremendous popular vote is interpreted as a vote for peace, sobriety and responsibility.

The Democratic Vice-Presidential candidate Hubert Humphrey is automatically elected with Mr. Johnson.

Of the electoral college vote, Mr. Johnson had 486 votes, 216 more than he needed to earn a full four-year term as President in his own right.

The Democrats had secured 66 seats in the Senate and the Republicans 33 compared to 66-34 line-up previously. In the House of Representatives the Democrats had secured 264 seats and the Republicans 121 with 50 results to be declared.

The Kennedy brothers, Robert and Edward, were also elected to the Senate. Republican candidate George Murphy, Hollywood film star defeated Democratic Senator Pierre Salinger, who had served as Press Secretary to Presidents Kennedy and Johnson. Texas Governor John Connolly who was shot while driving through Dallas with the Late President Kennedy, gained another term.

India's Prime Minister Shastri and President Radhakrishnan have sent messages to Mr. Johnson.

The Union Government yesterday approved the details to set up a Food Corporation of India.

The decision to rename it The Food Corporation of India instead of the proposed Foodgrains Corporation was taken so that its scope may be widened, when necessary, to deal with food stuffs other than foodgrains also. The behaviour of the normal channels of trade in recent months had obviously made it clear to the Government that it could not expect these channels to be more co-operative in the future.

The headquarters of the corporation will be Madras and share capital would be Rs. 100 crores. The Government of India would have complete control over it.

The legislation will also empower the Government to set up State Food Corporations after consultations with the State Governments.

Mysore Dasara Exhibition

"DOWN-EARTH" POLICY NEEDED

Mysore, Nov. 7

With the curtain being lowered in the monthlong Mysore Dasara Exhibition tomorrow, the visitors are prone to pause and reflect reminiscently the utilitarian aspect ofthe Exhibition. In the common parlance of the term, exhibitions have come to mean a store-house of knowledge beaming forth light on the current trends of developmental activities manifested in the numerous exhibits.

Well, how far our Mysore Exhibition has lived upto these avowed objectives? It is indeed, a sickening experience for the visitor to see the gross betrayal of sense of imagination on the part of powers that be in arranging the exhibition of Governmental stalls in a hackneyed fashion.

Most of these stalls do not catch with the rapid strides the country is making in various fields -economic, social and industrial.

What one sees is the hanging of age-old exhibits never corresponding to the current trends. Thus the exhibition has been made a farce. If the authorities want to see the exhibition lives up to these avowed declarations they must plan it on a systematic basis importing a sense of realism, seriousness and imagination so as to avoid making it as Devaraja Market, as has been presently done.

P.M.'s ASSURANCE

Prime Minister Shastri said in Madras yesterday that there should be no cause for 'fear or anxiety' in the minds of people of the South that spread of Hindi would lead to eventual domination of the South by the North.

But the Government of India would not allow such a thing to happen and the people of the South need have no fear of this. "We cannot allow any unfair advantage to anybody", he said.

AICC Endorses Govt. Food Policy

The All-India Congress Committee meeting in Nehru Nagar, Guntur, yesterday in an official resolution endorsed the Government's food policy. However, it left the issue of rationing still open for discussion by the State Chief Ministers at Delhi on Nov. 17 and 18.

Union Minister for Steel and Mines Sanjiva Reddy, moving the resolution, said that if the food problem is not solved, the future of India will be very dark. Even after 17 years of Independence, the condition of the ryot had not appreciably improved. The cultivator should be supplied with fertilisers, pesticides, seed, cement, steel and all essentials required by him and induced to produce more. He suggested crop insurance to help ryots who suffered losses from flood and drought.

Food and Agriculture Minister Subramaniam told the committee that the Chief Ministers were expected to take "firm decisions" on the mechanism of building up of a sizeable buffer stock out of surpluses from the coming harvest and on controlled distribution.

He said that regulated purchase and distribution of foodgrains were inevitable in a deficit food economy. He made it clear that there was no escape from controls on consumption, distribution and movement of food grains for at least four or five years.

In the debate members urged that the utmost priority should be given to agricultural production. They called for checking the population growth and effecting a change in the food habits.

India Not To Join Nuclear Race

Prime Minister Shastri yesterday made it clear that India would not join the race for nuclear bombs but would concentrate on efforts to eliminate the nuclear terror from China or any other country.

Intervening in the debate on the foreign affiars in the AICC meeting yesterday, Sri Shastri said that to seek protection under the nuclear umbrella of some body else was to lose independence.

SURPLUS STATES' PLEA

The State Chief Ministers will meet in New Delhi on Nov. 17 and 18 to formulate the policy on procurement, distribution and supply of foodgrains and co-ordinate movement from surplus to deficit States.

The Congrsss President has been empowered to constitute a small committee, including the Prime Minister, to advise him on food from time to time.

The surplus States have insisted on the Centre taking over the excess grain on government-to-government trading account and allow each State to be a separate food zone.

DASARA EXHIBITION CONCLUDES

Mysore, Nov. 9

The 33-day-old Dasara Exhibition concluded here yesterday. Labour Minister Devaraj Urs distributed the prizes.

Sri Rajannna, Secretary presenting a report said the gate collections this year amounted to Rs. 1,41,069 as against Rs. 1,37,741 last year. The rent collected this year was Rs. 1,11,671 as against of Rs. 1,03,556 last year.

Deputy Minister for Co-Operation Kondajji Basappa presided.

Smt. K.S.Nagarathnamma, MLA, welcomed the gathering.

NEED FOR BUILDING BUFFER STOCK

Union Food Minister Subramaniam told the All-India Congress Committee yesterday that now the country had reached the period of its main harvest this was the time to evolve a far sighted long-term policy of purchase and distribution.

There was bound to be a deficit during the next four or five years. Only 50 to 60 per cent of the demand could be met with whatever was produced or imported. Nor would it be possible to go on importing larger and larger quantities. This year was going to be a good crop year. Hence this was the time for building up buffer stocks. If not there would be greater difficulty and even catastrophe in the coming years, he warned.

CENTRE ASKED TO RUSH STOCKS

The Kerala Government yesterday asked the Union Government to air-lift rice stocks to the State to avoid a break-down of supplies.

Wide-spread demonstrations and violent acts were reported all over the State. There were wide-spread student demonstrations in Trivandrum and Quilon districts. Police resorted to tear-gas and lathi-charge to disperse stone-throwing students.

In Quilon students set fire to two sheds in a college campus, entered and ransacked shops and godowns, and stoned transport buses. Even private houses were not spared.

A passenger train coming from Madurai to Quilon was stopped at Kundara by a 1,000-strong crowd which broke open the parcel van and looted seven rice bags and ten bunches of plantain fruits.

Rioters pulled out about 600 bags of rice from the shops of four wholesalers, loaded them on handcarts and took them to the Collectorate.

The State Government ordered all educational institutions, excepting primary schools and professional colleges, to be closed for a week from today in both districts.

Governor Giri, in a special broadcast, appealing to the people to bear the distress with dignity and restraint, assured that "all possible action is being taken with the greatest possible sense of urgency to obtain adequate supplies".

Tackle Food Problem On National Basis

P.M. TELLS SURPLUS STATES

Prime Minister Lal Bahadur Shastri stated in Tirupathi yesterday that in view of the present difficult position in the country, the food problem should be tackled on a national basis. "The country should not be divided into compartments, and where ever there is surplus, it should be sent out as the Centre directs", he said.

The PrimeMinister warned the traders that they would have to face "strong measures which the Government has decided to take against them" if they did not adhere to the prices fixed by the Government.

The present crop was "very good" not only in Andhra Pradesh but in the rest of the country, and in this circumstance, the consumers should not be inflicted with high prices, he said.

Sri Shastri said that besides foodgrains, it was the desire of the Union Government to fix prices for some of the essential commodities like cloth, sugar and if possible, cement, vegetable oils and kerosene. If these items were supplied to the people at regulated and reasonables prices, it would give immense relief to the people as a whole.

Cong. Secretary Rajagopalan Dead

Sri G. Rajagopalan, Congress General Secretary, died at Guntur yesterday at 2.30 p.m. He was aged 43.

He was suddenly taken ill on Monday when he came to Vijayawada from Guntur after the conclusion of the AICC session. He was rushed back to Guntur and admitted in the general hospital there.

Congress President Kamaraj who rushed back to Guntur on hearing the news of his sudden illness, was at his bedside when Sri Rajagopalan passed away.

MANAGEMENT OF TEMPLES

Prime Minister Shastri stated in Tirupathi yesterday that the Government of India was seriously considering steps to be taken for better management of temples in all States. He was laying the foundation-stone of a multi-storeyed building to be put up by the Mysore Government for pilgrims.

Referring to the hesitancy on the part of Andhra Pradesh to supply its surpluses of foodgrains to other States, the Prime Minister said, that Andhra Pradesh in doing so had been motivated to fetch higher price for their farmers.

The surplus State of Andhra should take the responsibility to feed the nation. It was wrong to be narrow minded, he added.

BAR ASSOCIATION WARNING

The Bar Association of India stated yesterday that any amendment of the Constitution barring citizens from approaching courts of law in cases of commital by legislature for its contempt "can only result in shaking the basic foundation of the Constitution".

It said: "the rule of law can have meaning only when superior courts have the power and the authority to enforce all laws whether ordinary or funadamental".

EARLY MERGER OF GOA

Defence Minister Chavan told pressmen in Bombay yesterday that he would pursue the issue of immediate merger of Goa in Maharashtra. He said that he had discussions on this question with Sri S.K. Patil at Guntur and the talks were satisfactory.

He left for London on a 10-day visit for talks with the British Government on India's defence requirements.

Rice Being Rushed To Kerala

Prime Minister Shastri has ordered immediate movement of rice from Andhra Pradesh to Kerala to meet the critical position in the State.

About fifty food special trains carrying foodgrains left Andhra Pradesh yesterday to Kerala.

Home Minister Nanda deputed a special officer to ensure that special trains carrying foodgrains reached their destinations without delay.

The Centre has informed the Kerala Government that is was not possible to air-lift rice stocks to the State. It was arranging to send 10,000 tons of paddy to be milled in Kerala.

Mounted police had to be pressed into service several times to disperse the stone-pelting crowds in Trivandrum yesterday. Many rioting students and workers were arrested. A day-long 'squatting satyagraha' was observed by the city fathers to bring home to the Government the gravity of the food situation.

To curb this mania it was necessary to diversify secondary education and give ample opportunities to students to take up various technical, industrial and commercial courses, other than university degrees, at the end of the secondary stage. The students should realise the importance and potentiality of these courses and not rush to the university for degrees, he added.

Corruption In Customs And Excise Depts.

TAX-DODGERS IN CLOSE TOUCH WITH OFFICIALS

Union Finance Minister Krishnamachari stated in Bombay yesterday that there was a strong public feeling that "wrong-doers were in close touch with the officials".

Inaugurating the conference of Collectors of Central Excise and Customs, he said that corruption in the ranks of the customs and the excise services accounted for the "enormous post-war increase in evasion of duties and in smuggling and all kinds of wrong things".

"The reputation of the preventive section of the customs is not very high. It is really bad in Bombay and Calcutta. It has not improved", Sri Krishnamachari said.

The Minister felt there was some thing very rotten about the whole system of recruiting to the cadres in the services, which contributed towards corruption.

The customs collectors and assistant collectors were above it, but people immediately below them were not. The position was not as good as it ought to be and something had to be done, he said.

Calling for the toning up of the customs and excise administration, the Minister said that the customs administration in India should be similar to that which obtained in Britain.

Sri Krishnamachari said that tax evasion today was to the extent of 70 per cent. He would be happy if 66 per cent of taxes was collected. With indirect taxes very much in the picture and with some sort of controls on all essential commodities inescapable effective collection of revenues must be organised.

RICE SUPPLY FROM ANDHRA

A spokesman of the Food Ministry stated in New Delhi yesterday: "We have been doing our best to move grain, but for various reasons stocks have not moved". The 'failure' to move speedily from Andhra to Madras and Mysore was the main reason for the "temporary" food difficulties in the two States.

He said according to the Andhra Pradesh Government, grain had moved out of the State, but the States to which supplies had been dispatched had not received them, possibly because "they had gone into the wrong channels".

End Of Black Money In Two Years

He said the Government was not chasing the distant goal of an affluent society but was trying to give the people a decent living and curb the greed of those who were in a position to put obstacles in the way.

According to the Bill, a minimum penalty of 20 per cent of the tax was provided for concealment. Minimum penalties were also prescribed for failure to furnish the return of net wealth.

Sri Hanumanthaiya said that the Government represented Parliament because it had the majority.

The Speaker: Does he think that Parliament and the Government are the same? It would be a tragedy if both become one.

SRI PRAKASA'S ADVICE TO NEW GRADUATES

Mysore, Dec. 5

The 45th annual convocation of the Mysore University was held here this morning at the Crawford Hall. The Chancellor, Sri S.M. Nagesh presided.

As many as 5,219 candidates including 1212 ladies received the degrees, 2,770 in person (671 ladies) and 2449 (541 girls) in absentia.

Shri Sri Prakasa, former Governor of Bombay, who is to have addressed the new graduates was unable to be present owing to indisposition. His address was read by Vice-Chancellor Shrimali.

Shri Sri Prakasa called upon the young graduates to make themselves into good citizens.

He said: 'A person who works hard so that he may do his work well; who is responsible so that all who deal with him,can depend upon him; who is generous so that he hands over his work to future generations to improve; and who is proud of his work so that he feels happy in what he is doing and does it well, is a true citizen, and he alone can be a true democrat. If we want to make our democracy a success, we must all be such citizens'.

Asking them to be pattriotic, he said "this must be sedulously, consistently, persistently taught to us at every stage of our life, training and education, for let there be no mistaking, we sadly lack this cardinal virtue'. That accounted for all the endless squabbles over caste and creed, over language and region. 'We are not prepared to keep our country above everything and hence we miserably fail in most of the things we seem to do'.

Sri Shri Prakasa said 'if we are to prove worthy of the freedom we have attained, the political status we have given unto ourselves and the legacy we have inherited from ages past, we have to be patriotic'.

Mysore has told the members of the Central Water and Power Commission that it was prepared to make available surplus waters from the left bank canal of the Tungabhadra project to Andhra Pradesh only after meeting the full demands of irrigation and power in the Mysore area.

For the past few years, Mysore was supplying water for Andhra Pradesh on an ad hoc basis as the former was not fully using the waters. Andhra utilised the Tungabhadra waters for raising a second crop in 50,000 to one lakh acres annually. The demand this year is for four lakh acres due to recent floods there.

It was pointed to the CWPC team that the position in Mysore had changed now owing to the growing irrigation-consciousness of the people in Raichur district which is served by the left bank and also in view of the demand of water for summer paddy in Bellary on the right bank low level canal.

Additionally, a big development programme to develop the irrigation potential of 5.8 lakh acres on the left bank has been taken up.

Follow Common Policy

NANDA ASKS CMs

Home Minister Nanda yesterday stressed the need for developing a common policy and the direction to solve more important problems facing the States and the country.

Addressing the Chief Ministers' Conference at Delhi, Sri Nanda said there could be flexibility of approach towards the enforcement of various Central orders according to the particular local conditions and requirements.

But the common approach should be uniform considering the good of the whole country and not of any particular region or State.

Though he was particularly referring to the food situation in the country and the Central orders to regularise the distribution of foodgrains, he meant that the common policy should also be applied in dealing with the cases of corruption, student indiscipline and food riots.

Sri Nanda also referred to the way certain political parties should be dealt with for their anti-national and communal deeds in the States.

Short-Term Plan To Double Food Output

Prime Minister Shastri stated yesterday that to increase agricultural production, the Planning Commission had been asked to formulate a separate short-term plan for the first two years of the Fourth Plan.

He said the short-term plan would be such that in the shortest possible time and with modern simple indigenous equipment, the production of foodgrains would be doubled.

Sri Shastri said it was not advisable to completely mechanise agriculture. This would need import of machinery and increase our indebtedness. It would not also bring the desired results. Therefore, the country should attempt to produce with available indigenous materials simple and useful farm implements which could be easily operated by farmers and did not require experts.

ENFORCE FOOD LAWS

At the Chief Ministers' Conference yesterday at Delhi, it was generally agreed that 'in the situation as it exists today' every endeavour must be made to enforce food controls and laws, including the recently-promulgated anti-hoarding anti-profiteering ordinance, as effectively as possible.

In the Lok Sabha Opposition members strongly criticised the proposals to drop two of the six ordnance factories planned after the Chinese aggression.

Sri Dandekar warned about a Chinese invasion next spring and demanded an assurance from the Government that an adequate number of well-trained mountain divisions have been lined up along the Northern borders to meet the threat.

He also referred to the Minister's plea that 'the investment-output ratio' of these two factories was high and said whether a country, anxious to secure its defence could afford to take a decision about the production of explosives on the basis of its economy.

Chamarajanagar-Satyamangalam Rly. Line

AGITATION CAMPAIGN

Mysore, Dec. 18

Sri M.K. Lingiah, Municipal Councillor, stated here yesterday that if the Chamarajanagar-—Satyamangalam railway line is not included at least in the Fourth Plan, the people of Mysore has to start an agitation.

Speaking to newsmen, he said the Central Government had done injustice to the people of this area by not taking up this railway line. This line would cut the distance from Bombay to Coimbatore by 645 km. via Dharmavaram and 162 km. via Salem.

Sri Lingiah said that signature campaign. meetings, conferences, deputations and finally agitation would be organised to urge for the immediate taking up of this railway line.

He appealed to all institutions and organisations to co-operate in this campaign.

Sri M.K. Lingiah had recently met the Union Railway Minister in New Delhi and presented a memorandum.

Spy Menace

However, he assured that no mercy would be shown to those found guilty and 'the worst that can be done to these people will be done'.

NO GOA MERGER

Mysore Chief Minister Nijalingappa stated yesterday that Maharashtra's claim on Goa based on the 'poll verdict' was untenable as more votes had been cast against the merger demand than for it.

'If anybody wants to consult the people of Goa, let them dissolve the present Assembly and fight the elections purely on the merger issue', he said.

He saw no reason for the Congress Parliamentary Board to reopen the issue in view of the decision of the late Prime Minister for ten-year moratorium.

Reiterating the Mysore stand on the Goa issue, he said while Mysore had a clear case, it would not press for Goa's merger immediately.

Pak Diplomat Expelled

NO CHANGE IN DEFENCE STRATEGY

Legislation To Regulate Use Of Pesticides

SYMPOSIUM PRESIDENT'S PLEA

Mysore, Dec. 22

If by the application of modern scientific methods they succeeded in reducing this damage to a minimum, they would make a great contribution to increase agricultural production.

He said increased agricultural production and the conservation of the national resources of food in harons, werehouses and godowns had assumed particular significanse within recent years on account of the acute shortage of food.

He said in the rural India, where the peasant were illiterate, it was very necessary to find new means with the sole object of keeping away the hazards of these toxic and insecticioles from peasantry and their livestock.

Plan Accent On Common Man

PM'S CALL TO PRIVATE SECTOR

Prime Minister Shastri declared yesterday that the accent in the Fourth Plan must be on the well-being of the common man.

Addressing the annual meeting of the Associated Chambers of Commerce and Industry in Calcutta, the Prime Minister said that the investment envisaged in the private sector in the Fourth Plan as a whole would be more than a third of the total investment. The responsibility of achieving the targets in the Fourth Plan was a national one and 'we have all got to put our minds together to ensure that the weakness of one sector does not impair the strength of another'.

He said the share of the private sector in organised industries in the Fourth Plan is expected to be almost half of the total investment in the industrial field. Describing 'such a huge investment programme' as a challenge, Sri Shastri called upon the private enterprise to press into service all its ingenuity to tap investible funds from all possible sources.

Sri Shastri said 'in the course of ten years or so, it will be our endeavour to ensure a minimum living standard to our people. In the realisation of this objective, the private sector will necessarily have to play an important role in as much as the consumer industries including agriculture, fall almost entirely within its ambit'.

TAX TRIBUNAL'S TRANSFER OPPOSED

Union Law Minister Sen yesterday opposed the suggestion made by the Chief Justice of the Supreme Court for abolition of the Income-Tax Appellate Tribunal.

The Chief Justice had suggested the abolition because the tax structure was getting more complex and comprehensive day by day.

Sri Sen said that the transfer of the functions of the Appellate Tribunal to high courts could be justified only on two grounds, quality and and expedition. But transfer would be undesirable on both counts.

High Courts, he said, were at present concerned with law. If the change was to be effected, they would be converted into forum for facts, which was not desirable.

HOMES EOR POORER PEOPLE

The three-day Housing Ministers' Conference being held at Chandigarh from tomorrow will discuss a four-point programme for stepping up housing activity, especially for poorer people.

They are: providing more houses to industrial workers, slum dwellers and landless tenants; setting up housing boards at the Centre and in the States; creating a revolving fund for bulk acquisition of land for urban development and rationalisation of present schemes and administrative machinery for effective implementation.

Out of 1,70,700 houses sanctioned for industrial workers, the private employers have built only 32,477 houses–about 19 per cent of the total number of houses.

The village housing scheme which is being implemented at present covers only 5,000 villages or just about 1 per cent of the 5,67,000 villages in the country. The Union Government proposes to take up village housing in the next Plan in a high way and has, accordingly, suggested an allocation of Rs. 70 crores in the fourth Plan.

Of the need to make family planning purposeful, the President said: We cannot enjoy the fruits of progress unless we manage to stem the tide of over-population and this cannot be done unless we make it our personal responsibility to guide, instruct and help our less advanced sisters.

She also stressed the need for providing more amenities to the working girls.

Chief Minister Nijalingappa who inaugurated the conference emphasised the urgent and important task of devising profitable changes in the food habits in families. He also appealed for carrying the message of family planning to the rural areas.

Family Planning Board

WOMEN'S CONFERENCE PLEA

The All-India Women's Conference which concluded its three-day session yesterday at Bangalore has urged for setting up of a ministry of population or, in the alternative, a statutory family planning board with a full time chairman to intensify the programme.

It regretted that less than one-third of the funds allocated for family planning in the current plan had been spent so fa,r although this was the fourth year of the plan.

The conference urged the governments at the Centre and in the States to undertake more vigorous and dynamic programmes that would reach the rural areas, since the enormous increase in population would have dire consequences on measure of socio-economic development.

In another resolution, the conference demanded governmental measures to arrest price spiral and to step up production from an all-India point of view.

The conference views with mounting anxiety the acute shortage in many commodities of daily use, which were bringing untold hardships to all sections of the people and causing unrest and discontent to an unprecedented extent. Women in particular were harassed by these difficulties since they managed the household bugets.

Intensive Ragi Cultivation

Mysore, Dec. 31

Intensive ragi cultivation programme has been sanctioned for Mysore and Hassan Districts from the year 1965-66. To discuss the preliminary arrangements for the implementation of this programme, Sri R. Srinivasan, Divisional Commissioner, Mysore Division convened a meeting, which took a number of decisions for the successful working of the scheme.

This programme covers an area of about 2.1 lakhs acres of Mysore District, to be taken up in the Taluks of Mysore, Heggadadevankote, Kollegal, Krishnarajanagar and Hunsur and 2.5 lakhs acres in Hassan district in the Taluks of Hassan, Channarayapatna, Arsikere, Holenarasipur and Arkalgud. The Scheme will cost Rs. 1.3 lakhs per year per district. Use of improved variety of seeds of ragi, seed dressing against seed borne disease, application of fertilisers to ragi crop and plant protection measures are the main programmes under the scheme. Popularisation of dry farming practices such as field bunding, levelling, contour cultivation, strip cropping and mixed cropping, application of farm yard manure, timely sowing, wider spacing by transplanting and lower seed rate, interculture and weeding, supply of improved agricultural implements, sprayers, dusters, pesticides and fungicides on a subsidised basis and grant of short term credit are the main features of this scheme. Subsidy at the rate of 25 per cent to farmers who buy improved implements and at 50 per cent for pesticides and fungicides will be given by Government.

An additional staff consisting of one District Agricultural Officer, five Agricultural Demonstrators and twenty five Feld Assistants has been sanctioned for each District covered under the programme to attend exclusively to the work connected with the implementation of the programme. A number of demonstrations will be organised to demonstrate to the ryots various improved agricultural practices.

Nanda Warns Traitors

Union Home Minister Nanda yesterday sounded a stern warning to those with extra-territorial loyalty and other anti-social elements who were trying to split and demoralise the country when the Chinese were knocking at our doors.

These people, he said, deserved to be treated with utmost sterness because if they were given a free hand, the nation would face total ruin.

GREETINGS

The SAMACHAR wishes its readers a HAPPY NEW YEAR.

SWOOP ON LEFT REDS

500 HELD FOR PRO-CHINA ACTIVITIES

About 500 Leftist Communists were rounded up all over the country, in a surprise swoop yesterday, under a directive from the Centre.

The arrests were ordered on the basis of irrefutable evidence in the Government's possession that the left group of the party had become a 'potential fifth column of China' and posed a threat to the country's internal and external security.

The Government had definite information that the leftists were preparing for revolutionary action during the next few months.

It is stated that left Communists had circulated secretly a large number of documents, their own as well as from Chinese and other foreign sources. One of the documents stated that the 'last time' the Communist Party had failed the Chinese at the time of their aggression against India in 1962 but this time it was determined not to fail.

The largest number of arrests was made from Andhra and Kerala where the party is the strongest.

13 leftist Communists in different parts of Mysore State, including M.N. Ugrappa from Mysore City were taken into preventive custody yesterday.

FOREIGN MONEY

Foreign business investment in India had risen gradually reaching a book value of Rs. 681 crores by the end of 1961, as compared with Rs. 442 crores in 1955.

Left Reds Under Peking's Inspiration

Union Home Minister Nanda stated yesterday that Government had every reason to believe that the left Communist Party of India had been formed 'under Peking's inspiration'.

He alleged that the objective of the party was 'to serve as Peking's instrument in creating conditions of instability in the country and to facilitate the promotion of Chinese designs against India in furtherance of her grand strategy of establishing hegemony over Asia and her declared aim of world revolution'.

The object of the leftists now, he said, was to take advantage of the presence of a Communist power across the Indian border and 'to promote an internal revolution to synchronise with a fresh Chinese attack, destroying the democratic Government of India through a kind of pincer movement which was hoped for but could not materialise in 1962'.

Sri Nanda said 'we would be taking a serious risk with the external and internal security of the country if we did not act immediately'.

About 700 active members of the left Communist Party have been arrested so far.

NO FOILING OF BANDUNG IDEALS

India will resist any attempts at the forthcoming second Afro-Asian conference at Algiers to 'denigrate or dilute' the Bandung principles of world peace and peaceful co-existence.

It is stated that any move to sanctify the use of force to change the boundary between two countries would be considered as very dangerous and would meet with stiff opposition from India.

CITY FORUM TO RUN CORPORATION

The Bangalore Civic Forum which captured 26 seats in the elections to the Municipal Corporation will run the administration as 11 independent councillors have agreed to support the Forum, stated Sri T. Subramanya, President of the Forum.

CITY FATHERS COMPLAIN

Mysore, Jan. 2

The monthly meeting of the City Municipal Council was held on Thursday.

Both the Congress and Opposition members complained about the non-availability of wheat and wheat products in the city. Even the December quota had not been supplied.

Sri B.G. Das said that the prices of foodgrains were raising every day. He alleged that merchants by advancing money to the ryots had bought foodgrains and selling them at their own rates.

Sri L. Chikkarangappa warned that if the Government did not take prompt action, there would be food famine again.

Sri T.V. Srinivasa Rao wanted that all British statues and the roads named after them in the city should be removed.

Sri T. R. Subba Rao said the Municipality had neglected the Yadavagiri extension. The Council should take immediate action in removing unauthroised huts in the area.

V-P.'s Call To End Food Deficit By 1969

Dr. Zakir Hussain, Vice-President, yestetday, appealed to the irrigation and power engineers to make intelligent, earnest and persistent efforts to meet the food shortage in the country and wipe off the food deficit by 1969.

The birth centenary of Mahatma Gandhi falls in 1969 and therefore it was felt by the Central Board of Irrigation and Power that India should irrigate 100 million acres of land to produce 100 million tons of foodgrains which required by the country for self-sufficiency.

He said India should be self-sufficient in food and unless that was achieved, the standard of living of the masses would continue to remain very low.

Dr. Hussain inaugurating the 37th annual meeting of the CBIP, suggested the fullest possible coordination between irrigation engineers and agricultural experts. There should be in-service refresher courses for the irrigation engineers to be trained in agricultural matters and vice versa.

The committee on resources of the National Development Council, yesterday, was optimistic that the resources for the fourth plan could be found.

SAHDUS' PRIRORITY FOR SADACHAR

The Bharat Sadhu Samaj had given top priority for the Sadachar movement in the country, stated Swami Mangaldeoji, senior vice-president of the Samaj in his presidential address to the fifth all-India conference of the Samaj, held at Kottayam in Kerala.

The Swami said it was gratifying to note that the Union Home Minister had given the lead to the nation for purification of the administration and public life.

Union Home Minister Nanda in a message said that sadhus commanded great respect among the masses and, therefore, they could play a vital role in raising the moral and spiritual standard of the country.

He said the corruption that has penetrated deep into the body of our society has contaminated the entire system. The sacred order of the sadhus can cure it. The need of the hour is that this corruption is rooted out and prevalent malpractices in the masses are put to a stop.

DIRECT PURCHASE CONTRACTS WITH MYSORE FARMERS

FOOD CORPORATION'S DECISION

Sri Pai said he had also persuaded the Government of Mysore to loan 60,000 tons of imported fertilisers it had in stock to the farmers repayable after harvest in the shape of grains. Distribution of the fertilisers would be entrusted to the taluk credit societies.

Sri Shastri said rural electrification was essential for promoting rural industrialisation. Without this, it was not possible to create greater employment potential.

The resolution, he said, also prescribed higher priority for agriculture. It also emphasised that weaker sections of small farmers should be specially attended to. 'They should get credit facilities for development of agriculture as well as to enable them to become owner of their land. For that special banking facilities will have to be provided for'.

He declared that India had been striving to promote the ideal of total disarmament and outlawing of war in a world 'from which we do not want to live in isolation. He told the subjects committee of the 69th session of the Congress that 'I cannot say what will happen in the future. What will be the circumstances nobody can say'.

SPEAKER ASSAILS S.C. OPINION

LEGISLATURES NOT INFERIOR COURTS

Sri Hukum Singh, Speaker of the Lok Sabha, stated yesterday he honestly believed that the opinion of the Supreme Court, on a reference by the President following a privilege issue in the U.P. Vidhan Sabha, was "wrong in some respects and many arguments harnessed to support it were untenable and irrelevant".

Addressing a two-day conference of presiding officers of Legislatures in Bombay, he said that the intention of the Constitution-makers was that when Parliament orLegislatures convicted a citizen for contempt, the jurisdiction of courts was ousted.

This original intention should be given effect to by suitable expressions in Article 194 (3) of the Constitution, he stressed, and said "we do not ask for anything more, anything new".

The Speaker said the opinion of the Supreme Court had already corroded the privilges of the legislatures. Since that opinion was announced there had been indications in the country that some people had felt encouraged to bring into contempt our legislatures.

Sri Hukum Singh, however, advised: "We should never do any thing which might in any way damage or impair the high esteem in which our judiciary is held. We must try to enhance their prestige".

The Minister, who was addressing a meeting of the Central Committee on Employment said at the beginning of the current plan, there were, it is now estimated, about 8 millions unemployed persons. In the years 1961-66, 17 million more will be added. Of these 25 millions, the Third Plan is expected to provide employment to about 13 millions leaving a carry over of about 12 millions at the beginning of the Fourth Plan.

The tentative employment target for the Fourth Plan as indicated in the memorandum is about 23 to 25 millions though the plan as framed at present will have a lower employment content.

Air Link For Mysore Urged

Mysore, Jan. 18

The Mysore Chamber of Commerce and Industry yesterday strongly urged the Central Government to air link Mysore City with Bombay-Goa-Belgaum--Mangalore-Bangalore service.

It pointed out that by air linking the City, more foreign tourists could be attracted.

The Chamber which met under the presidentship of Sri F.K. Irani, stressed the need for Chamarajanagar-Satyamangalam railway line and decided to constitute a committee with Sri Irani as chairman and Sri Venkatalingiah, Municipal President as convenor, to take immediate steps to urge the State Government to impress upon the Centre to give priority in taking up this line in the fourth plan.

Sri Shankariah, MP told the meeting that the Railway Board has turned down this railway line as it was not remunerative. Still if the State Government urges for its top priority, then Mysore members of Parliament could effectively pursue the matter with the Railway Ministry.

Sri Vasudeva Murthy brought to the notice of the Chamber the difficulties experienced by foodgrain merchants regarding the transport of food grains from district to district. Though there was no restriction for the transport of foodgrains in the State, still the authorities seized foodgrains brought from outside to city.

Prime Minister Shastri yesterday strongly urged the United Nations and its Disarmament Committee to give "the most serious and earnest consideration" to the menace of proliferation of nuclear weapons.

He said "If the United Nations or the major nuclear Powers do not realise their responsibility in this regard, we and the world would be facing a great menace and danger. It is, therefore, important that the U.N. and the Disarmament Committee should give serious and earnest consideration to this matter."

Reorient Foreign Policy

JANA SANGHA'S PLEA

The working committee of the Bharatiya Jana Sangh has called for a reorientation of India's foreign policy to meet the aggressive threats posed by Communist China and Pakistan.

It has demanded that India should sever diplomatic relations with Communist China and stop supporting its entry into the United Nations.

At the same time, closer relations should be developed with all those countries of South-East Asia which are equally threatened by Communist Chinese imperialism and which are interested in the containment of China for ideological or other reasons.

The resolution emphasised the need to strengthen the country's defence potential by stepping up production of armaments, developing an independent nuclear deterrent, and by increasing the armed strength through conscription. A standing army of at least two million should be built up, the resolution said.

CORRESPONDENCE COURSES

The Study Group constituted by the National Council of Educational Research and Training under the Chairmanship of Shri Raja Roy Singh, Joint Director of the Council, to examine and report whether the techniques of instruction by correspondence could be used for professional education of teachers for primary and secondary schools, has submitted its report. It has strongly recommended the introduction of these courses.

To begin with, the Study Group has recommended, this benefit should be extended to the untrained teachers who are already in service. By the end of the Third Plan there will be five lakhs of untrained teachers in service-about four lakhs at the elementary stage and about one lakh at the secondary stage. "Correspondence courses, in our view, will be the most suitable instrument for dealing with this colossal problem", says the Study Group.

TWO BURN TO DEATH

ONE STUDENT KILLED IN POLICE FIRING

ANTI-HINDI STIR IN MADRAS STATE

Two cases of self-immolation in Madras city, death of a student in police firing in Annamalai University and mammoth student processions in several cities in Madras State were the incidents reported following the agitation launched by the DMK against Hindi.

Two persons burnt themselves as a protest against the imposition of Hindi in the South.

One of them was Sivalingam (24) a resident of Nungambakkam in Madras city, who is reported to have poured gasoline over his body and set himself ablaze in an open space near his house on Tuesday.

Another person, Ranganathan, a postal employee in Virthambakkam, near Madras, burnt himself after pouring kerosene over his body.

In Chidambaram, apart from one death, two others were injured when police opened fire yesterday on a riotous crowd of students against Hindi.

About 4000 students of Annamalai University and high schools in the town marched in procession from the university campus towards the town carrying burning torches and a huge effigy representing Hindi and were halted at the railway gate by the police.

Despite appeals by the authorities, the crowd insisted on proceeding and began to hurl stones when the police resorted to tear-gas and lathi-charge.

The mob grew more furious. Then the police opened fire. The students then marched into the university campus and burned some papers and furniture in the Registrar's office. The Registrar has ordered the closure of the resident university and asked the students to vacate the hostels.

In Madras city, several students and policemen were injured in student-police clashes. The police raided the hostels of Pachiappa's and Law Colleges and arrested 40 students.

Neurotic Athlete

Sri J.R.D. Tata yesterday compared the industry in the country with the bewildered athlete who had turned a neurotic due to the exhortation and threats administered to him by turns.

He said the restrictions which were imposed on industry and the liberlisations reminded him of the 'in digestible food, pep pills and tranquilisers' given to an athlete who had to learn the rules of the game which were constantly changing. The frequent amendment in the company law reminded him of the obstacles which were strewn in the path of the athlete.

No Abolition Of Food Zones

Union Food Minister Subramaniam stated yesterday that zonal restrictions on movement of foodgrains especially rice would not be abolished in the near future although the working of the system might be reviewed from time to time.

He said 'when making demand for the abolition of food zones, it has to be remembered that free trade means free exploitation'. If the zones were abolished, there might be some relief during the harvest but the position would worsen during the lean months.

The Food Minister said that as far as rice supply was concerned, he would say that the zonal system had not worked badly. About five lakh tonnes of rice had already been purchased.

Gandhism Is Deep Rooted

SAYS MORARJI

Mysore, Feb. 1

Sri Morarji Desai, former Union Finance Minister declared here yesterday that Gandhism had taken very deep roots in the soil of the country and 'even if we want to give it up, it cannot be done as it is powerful'.

He was declaring open Gandhi Bhavan at the Mysore University campus in Manasa Gangotri.

Sri Morarji said that on seeing disruption and divisions among the people, one cannot conclude that Gandhism is a lost thing. Such divisions are not the creation of today and even when Gandhiji was alive they were there-perhaps more aggressively.

He said 'today there was a lot of talk about divisions, immorality and corruption. Were they not found in the past too? People were aware of them. Today we have become sensitive to them and they were hopes of getting rid of them'.

Sri Desai commended the idea of having such institutions which would teach the Gandhian way of life to achieve the highest results for the progress of human society and raise the status of individuals.

V.C.'s CONCERN

Dr. Shrimali, Vice-Chancellor, in welcoming the gathering said "it is doubtful how far we will succeed in fulfilling the task of propagating the ideals of Gandhiji as the present climate in our coutry is hardly propitious for the task. The wind seems to be blowing against the Gandhian way of life, and at times, it appears that all that is left of Gandhism in India is the Rajghat Samadhi".

"The real trouble with us today is that we pay lip sympathy to ideals and do just the opposite in our daily life. We offer prayers at the Rajghat once a year and forget his teaching for the rest of tha year".

Chief Minister Nijalingappa, who presided, stressed the importance of builping up moral values.

Sri K.S. Ramachandran, Registrar proposed a vote of thanks.

Union Housing Minister Khana warned yesterday that unless the housing problem was tackled in right earnest by both the Centre and the States, 'it might get out of hand one day as in the case of food'.

He said it was paradoxical that while on the one hand the problem of housing was growing acute day by day, even the meagre funds allocated for building constructions in successive plans were not being fully utilised by the State Governments and were, in some cases, diverted to other subjects.

On a rought estimate, he put the need for new houses at one crore in urban areas and five crores in in rural sector. For raising funds to finance this stupendous task, he stressed the need for immediately starting housing boards in all the States and a Central housing board to co ordinate their work.

ANTI-HINDI RIOTS TAKE GRAVE TURN

2 COPS BURNT ALIVE: POLICE OPEN FIRE NINE TIMES

Troops have been moved to Tiruchengode in Salem District, Tiruppur in Coimbatore District and Karur In Trichy District in Madras State, which have been worst hit in the current anti-Hindi agitation.

Student demonstrators yesterday attacked railway stations and post offices and erased Hindi name boards all over the State, which led to the police opening fire.

Ten persons were killed in Kumarapalayam when police opened fire on a mob last night, when it attacked a textile mill and a police station. Kumarapalayam is a border town in Salem District.

The police opened fire in Tiruchengode in Salem District, for the second time, on a violent crowd of anti-Hindi demonstrators, resulting in the death of one and injuries to two. In the first firing two persons were killed and two were injured. The firing took place when the mob stormed a police station.

TWO COPS BURNT ALIVE

Two Sub-Inspectors of Police M. Ramaswamy and N. K. Venkateshan, were burnt to death by a riotous mob on the banks of the river Noyyal in the heart of Tiruppur in Coimbatore District.

The two sub-inspectors were proceeding in a lorry and they were surrounded by the demonstrators and the policemen took shelter in a ginning factory.

After burning the police lorry, the mob entered the factory and dragged the two sub-inspectors and poured kerosene over them and set them on fire. The inspectors were burnt to death.

Earlier in the day, four persons were killed and one injured in police firings in the town. 20 policemen including the DSP received injuries from stone-throwing.

CALL TO END AGITATION

Sri C. Rajagopalachari has renewed his appeal to students to immediately suspend their present agitation against imposition of Hindi. He said there need be no fear of the momentum of the movement being lost by reason of the suspension. He has also appealed to the Government to repeat Part 17 of the Constitution immediately without a second thought.

Sri C. N. Annadurai, DMK leader, has also appealed for the suspension of the agitation.

Paying tributes to the student community for what they had achieved by their agitation to focus attention on the Hindi issue, Sri Aannadurai said 'the student community should hence not allow the very natural desire to prolong the struggle but should suspend their direct action so that the amount of goodwill generated by their agitation takes shape and yields results'.

HIGHER RLY. PASSENGER, FREIGHT RATES

20 CRORES ADDITIONAL REVENUE

The Railway Budget for 1965 66 presented to Parliament by Railway Minister Patil proposes increase in both passenger fares to yield Rs. 13 crores and freight rates to yield Rs. 7 crores.

The Minister said that the increases were necessary to meet in part the additional commitments on various accounts, including the rise in dearness allowance announced in the last year.

There will be no increase in third class fares for travel upto six kiiometres. Journeys between six and 50 kilometres will entail an additional payment of 1 to 5 paise per ticket.

The increase in fares upto 800 kilometres for thrid and second class travel will be 10 per cent, and for longer journeys the increase will gradually come down to 5.8 per cent at 1,500 killometres and 3.1 per cent at 3,000kilometres.

For the first and air-conditioned classes, the increase of 10 per cent will be on the fares for distances upto 1,000 kilometre and 1,200 kilometres respectively, the rate tapering off beyond these distances. At 1,500 kilometres, the increase will be 8.1 per cent on air—conditioned class and 7 per cent on first class.

The monthly third class season tickets in Bombay areas will be increased by 50 paise for the maximum distance and less for shorter runs. There will be no change in the charges for season tickets in Bangalore.

In freight rates, the enhancement proposal will effect only a few items of heavy merchandise. It will be 4 to 7 per cent on commodities like iron and steel, cement, stone, limestone and ores and about 8 per cent on non-dangerous petroleum products.

When the proposed new railway fares come into force from April 1, the maximum increase in one journey however long the distance will be Rs. 1.70 for third class (ordinary) and Rs. 2 for third class (mail). For second class (mail) and first class the maximum increase will be Rs. 3.60 and Rs. 7.25 respectively.

After referring to the "favourable outlook" on the agricultural front, the report said that for the present there is no reason to fear any shortage of coal, power or transport. Industrial production in 1964-65 would be higher than in the previous year by 8 per cent.

An appraisal made by the Planning Commission shows that in the first three years of the Third Plan, practically no improvement has been made on the per capita consumption level of the people.

POOR PER CAPITA CONSUMPTION

An appraisal made by the Planning Commission shows that in the first three years of the Third Plan, practically no improvement has been made on the per capita consumption level of the people.

The per capita national income in 1960-61 was approximately Rs. 320 at 1960 61 prices. The average expenditure of consupmtion was about Rs. 270 per head per year or less than Rs. 23 per head per month or about 77 Paise per day. In the first three years of the Third Plan practically no improvement was made over this level.

The average consumption of Rs. 23 per head per month is considered too meagre to sustain a level of living tolerable in the modern context and is regarded as a significant index of the pervading poverty in the country.

SPEAKER'S RULING

The Speaker of the Lok Sabha, Sri Hukum Singh, yesterday ruled that members could quote from documents treated as secret and confidential by the Government, if the members frunished him in advance a copy of the report and also certify that he had verified the authenticity of the document.

In the Rajya Sabha, the Chairman left it to the discretion of the members to read out from a document but refused permission for presenting it to the Rajya Sabha.

The Speaker also said that a member was not obliged to disclose the source from which he had obtained such a document.

The Speaker's ruling which was greeted with cheers by Opposition, was described as "momentous" by some members.

The proposal to hold examinations for all-India services in English and Hindi and other principal regional languages "is a trap and an attempt to impose Hindi indirectly", it said.

If the language issue was not settled before Aug. 15 a programme would be chalked out to start the anti-Hindi agitation from June, it is learnt.

Patnaik, Mitra Exposed

The Speaker of the Lok Sabha yesterday allowed the Opposition member Sri Kamath to place on the table of the House the summaries of two Government documents on Orissa affairs-the report of the Central Bureau of Investigation and the findings of the Cabinet Sub-Committee.

This is the first time that a document claimed by the Government as secret and confidential has been allowed by the Speaker to be laid on the table of the House by a private member.

In its report, the Cabinet Sub-Committee has commented that the manner in which the former Chief Ministers of Orissa Patnaik and Biren Mitra conducted the Government transactions was 'definitely not in keeping with the normal standards of public conduct'.

The CBI has reported that 'the available material shows that a few concerns in which Patnaik and Mitra have or had interests made large financial interests'.

Pak Intrusion In Kutch Area

India's External affairs Minister Swaran Singh told both houses of Parliament that Pakistan's claim to the Kanjarkot area on the Kutch Sind border was 'totally contrary to the pre-partition maps' and the actual situation.

The fort at Kanjarkot is well within Indian territory and 1,300 yards south of the border but Pakistani vehicles are using a new track of the fort and Pakistani border forces are patrolling up to this track and obstructing Indian patrols.

India, he said, took a serious view of the Pakistani intrusions. He regretted Pakistan's 'most unhelpful attitude' and flatly denied that the Pakistan Rangers were at any time in de facto possession of Kanjarkot.

The non-gazetted employees of the Mysore Government have decided to resort to direct action from March 16 onwards to bring pressure on the Government to meet their demands.

Mrs. Devasia, President of the State NGOs Association has stated that the NGOs were prepared to accept the Madras Government scales of pay.

MYSORE NEEDS TOLD

The Mysore Government has urged the Finance Commission to come to its aid in giving a fair deal to the NGOs in the State, particularly at a time when all the other Southern States had done a lot to help them.

The State Government has also represented to the Commission the difficulties involved in pushing the varions schemes it has taken on hand and in completing several of its projects next year.

KERALA REBEL CONGRESS OFFER

At the same time, the Kerala Congress had made it clear that it will have no truck with the left Communists.

Dissidents To Quit Congress

It is learnt that dissident Congressmen in Mysore State have decided to quit the Pradesh Congress and form a new organisation on the lines of the Kerala Congress.

The dissidents understood to have arrived at this decision as they seemed to have felt that it was impossible for them to stay in the organisation and also they were dissatisfied with the Cabinet Sub-Committee's decision on the charges against Nijalingappa's Ministry.

Sri Chenniah, MLC is stated to have conveyed the group's decision to Congress President Kamaraj at his recent meeting with him at Madras.

The Kerala Pradesh Congress yesterday rejected the offer of cooperation by the rebel Congressmen for the formation of a coalition Government in the State.

NO TRUST MOVE

A no-conficence motion was admiteed in the Lok Sabha yesterday from the Opposition benches.

The motion, based mainly on the Orissa affairs, seeks to censure the Government for failure to ensure a high standard of public conduct to prevent abuse of power in Orissa and other States and for 'having brought the concept of constitutional government into disrepute by putting up party interest above national interest, attempting to sheild and exonerate those guilty of abuse and power and for failure to institute an enquiry into abuse of power'.

MYSORE CONGRESS REBELS DEFER ACTION

The Mysore Congress dissidents have agreed to defer their decisions for one month to leave the organisation and sit in opposition to the ruling party.

This decision has been taken on the advice of Congress President Kamraj who has advised them to wait for one month to enable him to look into their grievances.

He said 'I do not think it is impossible to achieve the Fourth Plan annual target of 120 million tonnes of foodgrains'.

Referring to industrial production, he said that the public sector had to expand considerably both as a matter of policy and also because it is not possible for the other sector to invest the tremendous sums of money needed to set up basic industries.

'Our fiscal policy is oriented towards greater production as also towards helping the weaker elements of society', he added.

NEHRU'S PLEDGE ON ENGLISH WILL BE KEPT UP

SAYS PRIME MINISTER

Prime Minister Shastri gave the assurance in the Rajya Sabha that his Government would abide by the wishes and the assurances given by the late Prime MinisterNehru on the question of a link language for the country and the status of English as an associate language.

He also said that it was very essential that all encouragement should be given to the regional languages which should be fully developed to become the languages of the States.

The Prime Minister admitted that there was genuine apprehensions on the part of the people of South India. He, however, wanted to dispel these apprehensions because he was certain that the function of a language was to unite and integrate the nation. Unity should be the first and the foremost consideration in the enunciation and execution of any policy.

Sri Shastri assured the people of the South that there would be no handicap in the matter of recruitment in the services or in promotions for officers who did not know Hindi.

He also said that Government never thought in terms of imposing any language on an unwilling people. He wanted that Hindi should be propagated and taught through non-Hindi efforts and there could not be an element of compulsion in it.

Against a provision of Rs. 20.05 crores, only slightly over Rs. 3 crores was utilised, leaving 85 per cent unutilised. Similarly, out of Rs. 27 71 crores provided for plant and machinery factory projects, a sum of Rs. 8 88 crores was utilised leaving 68 per cent unutilised

A building in Calcutta costing the Government Rs. 3,900 in rent per month was requisitioned in May 1962 and allotted to a Major General for his residence. The rent recovered from him was Rs. 112 30 per month

The report said that the decision to buy all its requirements of mules numbering about 4,500 from a particular Italian firm and not availing of an alternative Argentine offer had resulted in a loss of Rs. 16 lakhs.

ASSEMBLY'S POWER

A Division Bench of the Allahabad High Court has held that the Uttar Pradesh Legislative Assembly had power to commit a person for its contempt.

The Court held that the Assembly had, by virtue of Article 194 (3) of the Constitution, the same power to commit for its contempt as the House of Commons and that the petitioner's detention was not violation of the provisions of Article 22 (2) of the Constitution.

It dismissed the habeas corpus petition of Sri Keshav Singh against the sentence of seven days imprisonment passed against him last year by the U. P. Assembly for committing contempt of the House.

BABY FOODS

The Rajya Sabha was told by Minister Singh that there was an overall shortage of baby foods in the country and that State Governments had taken action to confiscate hoarded stocks and distribute them through co-operatives and that further capacity for manufacture of baby foods would be licensed soon.

The target of baby food production in the country during the fourth plan has been fixed at 12,000 tons by the Planning Commission.

He said in West Bengal, 1,96,000 lakh containers of baby food were seized by the State Government and 16 persons were detained under the Defence of India Rules.

NGOs SUSPEND MASS FAST

The Joint Council of Action of Mysore Government Employees yesterday decided to suspend for the present, the proposed mass fast scheduled for tomorrow, following the announcement by the Government regarding the scales of pay.

The association has expressed disappointment at the new pay scales. It regretted that the Government has lost sight of the principles underlying the demands in offering concessions both in January and now.

The council made it clear that the upgrading of a few scales to Madras level will create imbalance in the existing pay structure without remedying the existing grievances.

FOREIGN AID ON OUR TERMS

Union Finance Minister Krishnamachari declared in the Lok Sabha that while India was prepared to give every possible concession consistent with our self respect, 'we are not taking foreign assistance on terms which are not acceptable to us'.

LEFT REDS NOT TO BE FREED

PEKING HAND IN RED LEFT MOVES

Union Home Minister Nanda declared in the Lok Sabha that 900 and odd Left Communists arrested two months ago will neither be released nor be brought before the courts for trial. He also rejected demands for banning the Communist Party.

Defending the Government's action in rounding up the Left Communists, the Home Minister charged them with making clandestine preparations at Peking's behest to wage a 'Telengana type of warfare' against the lawfully established Government of India.

He said the Kerala election had nothing to do with their arrests and the Government could not have stayed its hands against the 'pro Peking leftists even for a single day more'.

Sri Nanda said this painful action had to be taken solely to protect the integrity of the country against possible attacks by China.

He told the House that the Left Reds were constantly in touch with the Chinese Embassy for 'direction and funds' to organise sabotage activities in the country.

The Left Communists were told to set up an elaborate underground apparatus in the utmost secrecy which must keep the right Communists out. In conformity with the directive that the masses should be prepared for armed rebellion, efforts were being made to train party units in guerilla warfare and create shelters and dumps.

Large quantities of clandestine literature based on Chinese materials had been circulated which preached the need for an armed struggle and tried to undermine the will of the people.

STAGGER VARSITY EXAMINATIONS

Union Education Minister Chagla told the Rajya Sabha that it had been suggested to universities by University Grants Commission that examinations should be staggered instead of being held at the end of two or three years.

Mysore Opposes Maharashtra's Move On Goa

The Mysore Legislative Council yesterday unanimously adopted a non-official resolution declaring that the people of Goa should have the right to determine their future and to that end Goa should continue to have self government for a period of ten years from the date of liberation.

The resolution regretted the merger resolution passed by the Maharashtra Legislature recently.

Chief Minister Nijalingappa declared that he would not tolerate anybody coercing any part of India to join this State or that State.

He said that he was not interested in whether Goa goes to Maharashtra or comes to Mysore, as he was interested in the rights of the Goa people to decide on their future.

The Chief Minister said that Mysore would give all assistance to Goa for economic development, not with any ulterior motive but to see that the newly liberated Goans enjoyed their democratic freedom and learnt their lessons in self-government.

He dubbed the Maharashtra Legislature resolution as unfortunate and remarked that he could not understand the hurry.

ONE KILLED IN FIRING: LANGUAGE RIOTS AGAIN

One person was killed and ten others were injured when police opened fire at two places in Ootacamund yesterday to control defiant anti-Hindi agitation.

A dusk-to dawn curfew has been imposed for three days.

Trouble started before the Municipal High School when some parents escorting their children to school were obstructed by striking students. They began pelting stones and the police had to open fire. The dispersed crowd again assembled at another place and again started peling stones. The police again opened fire.

ATTACK ON SHASTRI'S GOVT.

NO-CONFIDENCE MOVE IN LOK SABHA

The Lok Sabha yesterday began discussion on the no-confidence motion moved by PSP leader Dwivedy.

He said the economic situation had deteriorated, food position was worsening despite a bumper crop and prices were rising. The poor sections of the community had become helpless. Even teachers and doctors had to take resources to strike.

The language riots in Madras, he said, had shown that the Government was unable to face the situation. Why were people demanding statutory guarantee to retain English as the associate language when it was never demanded during Nehru's time? It was because people at large did not believe that the leadership would be able to implement what it said.

The Government lacked courage, sincerety, determination and foresight. The only foresight had shown was "Parkalam" (wait and see).

Sri Dwivedy said that most objectional aspect of the matter was the Cabinet's indifference to Parliament. Important matters were concealed deliberately. Decisions were taken at the back of Parliament and the nation by the 'syndicate and coterie which is jockeying for power." Even the Congress Party was helpless in breaking this hegemony.

Referring to the Orissa affair, he said today whenever allegations were made, the Government kept mum. They think their party is more important than the nation. Sri Shastri's statement was 'full of half truths'.

Seven other members also attacked the Government in regard to handling of Orissa affairs They demanded the constitution of a Commission to go into the charges against Mitra and Patnaik.

INCENTIVE TO DOCTORS

Mysore Finance Minister Jatti announced in the Legislative Council that the Government had decided to pay graduate doctors an additional allowance of Rs. 50 and licontiates Rs. 65 as incentive for rural service.

The Gouernment would also think of appointing retured doctors to serve the rural areas if they were it enough for work.

Goa Status Not To Be Disturbed

Bangalore, Mar. 16

The Mysore Legislative Assembly yesterday adopted a special resolution on Goa demanding that the territory be kept as a separate entity for ten years in keeping with the assurance held out by the late Nehru

It also noted with concern the Maharashtra moves on Goa.

Chief Minister Nijalingappa said that Mysore was exercising maximum restraint in pressing its claim for Goa, for it was for the Goans to decide their future freely in ten to fifteen years hence. He pointed that Konkani, the predominent language of the Goan people was an independent language and had no intimate connections with Marathi. He said Goa was naturally part of the malnad tract in Mysore State with which the territory shares 80 per cent of the borders.

A Konkani speaking Congress member, Sri Mauei Srinivas Naik said Konkanis in Mysore would launch an agitation against the merge of Goa with Maharashtra.

He said nearly three lakhs of Konkani fishermen on the Mysore coast were prepared to 'march on Goa' but they were restrained.

No Witch-Hunting

SAYS SHASTRI

The Lok Sabha yesterday rejected the Opposition motion of no-confidence in the Union Cabinet by 315-44 votes.

Prime Minister Shastri declared that the Government had already done what was right and proper about the Orissa affairs and would not go any further.

The Prime Minister said that he did not think any useful purpose would be served by setting up a commission in view of the fact that both Patnaik and Mitra had resigned their offices.

He said that he was one with anyone who wanted right and proper action to be taken against those found guilty but he was averse to 'witch-hunting'.

Sri Shastri felt that in this matter he had done his duty 'well and honestly' and without being pressurised by any lobby.

Referring to the charge that Government suffered from drift and indecision, he said this type of talk did not strengthen the country. Those who indulged in such talk should keep the larger interests of the country in view.

'This Government is here and will remain here with strength. It will continue to function and discharge its responsibilities,' he said.

Civil Rights To Negroes: Johnson Firm

President Johnson yesterday appeared before a joint session of Congress and urged for the speedy passage of the new civil rights Bill guaranteeing voting rights to Negroes.

Except during grave emergencies, the President never appears before Congress in person after delivering the State of the Union message.

The President said: 'There, long suffering men and women, peacefully protested the denial of their rights as Americans. Many were brutally assaulted. One good man—a man of God—was killed. There was no csause for pride in what happened in Selma.

"What happened in Selma is part of a fair larger movement which reaches into every section and State of America". It is the efforts of American Negroes to secure for themselves the full blessings of American life.

"Their cause must be our cause too. It is not just Negroes, but all of us who must overcome the crippling legacy of bigotry and injustice. And we shall overcome".

TRACTORS IDLE

About 20,000 out of 50,000 tractors in the country are lying idle for want of spare parts, stated Deputy Minister Shah Nawaz Khan in the Lok Sabha.

He said the total waste-land available for settlement of landless labour has been estimated at 85 lakh acres. In the first two Plans, 70,86 lakhs acres of land had been distributed. In the first two years of the Third Plan, 13 lakh acres had been distributed.

The number of families resettled till the end of 1963-64 was 43,878. 'We hope to settle 85,000 families by the end of the Third Plan,' he added.

India's Food Crisis Due To Hoarding

The blame for the food crisis in India last year and the rise in prices almost 26 per cent-must be placed on speculative hoardings, says an ECAFE economic survey.

The survey notes that in 1964, India actually had nearly six per cent increase in total cereal production despite a fall in wheat production. The per capita availability of food increased by three per cent, almost to the 1962 level. The food crisis was therefore, paradoxical.

UPROAR IN RAJYA SABHA

There was an uproar in the Rajya Sabha over the Minister Lakshmi Menon's statement that she did not recollect exactly what Sheikh Abdullah had described himself as in his application for a passport.

Several members asked whether Sheikh Abdullah had not described himself as a subject of Jammu and Kashmir instead of an Indian national. They said the Government had no business to give him a passport if he had not declared himself as an Indian.

The committee has cited this as a 'glaring instance' of red tapism, unwillingness to take responsibility and not permitting offices on the spot to take decisions, which all resulted in huge loss to the Government.

The case relates to the delay of more than five months in finalising the rate for a substituted item of work in the construction of the Linganamakki Dam.

It felt that the proposed autonomous body will be able to run the unit on commercial lines and publish reports giving useful information to farmers necessary in view of the great importance that the Fourth Plan will attach to agriculture and bocating food output.

He said the Government would secure 2 5 lakhs tons of foodgrains from the Centre add would procure similar quantity of rice and jowar for this purpose.

PWD ATTACKED

The Mysore Public Accounts Committee has attacked the State Public Works Department as 'it has no regard for financial rules'.

Repetition of irregularities by the department, despite the PAC's observation and Government instruction, showed 'utter disregard and gross violation of rules' by the officers

The committee has cited two types of irregularities. The are: taking up works without sanction, plans and estimates, and taking up works for which no provision is made.

The Union Government is expected to recommend that President's rule be continued in Kerala.

He said already 87 per cent of the students came under general concessions and six per cent under concessions to the Scheduled Castes and Tribes and only the remaining seven per cent paid fees.

Kannada As Medium Of Instruction

KANTHI'S PLEA

Mysore Education Minister stated in the State Assembly that English could not continue as the medium of instruction in colleges for an indefinite period and Kannada had to be made the medium in all stages of education in the State.

He said he strongly favoured regional language being used for the Union Public Service Commission examinations. If English and Hindi could be used, Sri Kanthi did not understand why Kannada could not be used. He did not also agree with those who felt that this would lead to the 'balkanisation' of the country.

Sri Kanthi personally felt that along with English, the Mysore Public Service Commission could have Kannada as the examinaiion lanugage.

Defence Readiness

The Defence Ministry's annual report for 1964 65, published, says that the attitude of China and Pakistan, and the continued occupation by China of vast tracts of our territory, had rendered it necessary to keep our defence forces "in a state of readiness".

As a first step in defence readiness, a Rs. 5,000-crore Five-Year Defence Plan was lauuched during the year under report.

The Defence Plan envisages expansion of the Army to strength of 825,000. The bulk of recruitment to the officer cadre and to other ranks has been completed.

Since November 1962, about 9,000 officers have been given Emergency Commissions, and the targets for non-technical officers have been achieved.

A comprehensive Five-Year Plan for modernisation of the existing ordnance factories at an estimated cost of over Rs 33.02 crores, with a foreign exchange component of Rs. 15 20 crores, has been drawn up. This plan is being given very high priority. The plant and machinery required for the first two years have already been projected.
